

# Curiosity, Information-Seeking, and Eagerness

**Goal APL-1: Children show curiosity and express interest in the world around them.**

## Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Show interest in others (smile or gaze at caregiver, make sounds or move body when other person is near). <i>APL-1a</i></li> <li>• Show interest in themselves (watch own hands, play with own feet). <i>APL-1b</i></li> <li>• React to new sights, sounds, tastes, smells, and touches (stick out tongue at first solid food, turn head quickly when door slams). <i>APL-1c</i></li> </ul>	<ul style="list-style-type: none"> <li>• Imitate what others are doing. <i>APL-1d</i></li> <li>• Show curiosity about their surroundings (with pointing, facial expressions, words). <i>APL-1e</i></li> <li>• Show pleasure when exploring and making things happen (clap, smile, repeat action again and again). <i>APL-1f</i></li> </ul>	<ul style="list-style-type: none"> <li>• Discover things that interest and amaze them and seek to share them with others. <i>APL-1g</i></li> <li>• Show pleasure in new skills and in what they have done. <i>APL-1h</i></li> <li>• Watch what others are doing and often try to participate. <i>APL-1i</i></li> </ul>	<ul style="list-style-type: none"> <li>• Discover things that interest and amaze them and seek to share them with others. <i>APL-1j</i></li> <li>• Communicate interest to others through verbal and nonverbal means (take teacher to the science center to see a new animal). <i>APL-1k</i></li> <li>• Show interest in a growing range of topics, ideas, and tasks. <i>APL-1l</i></li> </ul>	<ul style="list-style-type: none"> <li>• Discover things that interest and amaze them and seek to share them with others. <i>APL-1m</i></li> <li>• Communicate interest to others through verbal and nonverbal means (take teacher to the science center to see a new animal). <i>APL-1n</i></li> <li>• Show interest in a growing range of topics, ideas, and tasks. <i>APL-1o</i></li> <li>• Demonstrate interest in mastering new skills (e.g., writing name, riding a bike, dance moves, building skills). <i>APL-1p</i></li> </ul>

It is important for teachers to remember that persons from different cultures value different characteristics and qualities in children. Some cultures will encourage or value curiosity, while others may discourage children from demonstrating curiosity.

## Goal APL-2: Children actively seek to understand the world around them.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Explore the indoor and outdoor environment using all available senses—smell, hear, see, feel and taste. <i>APL-2a</i></li> <li>With appropriate supports, move toward interesting people, sounds, objects, and activities. <i>APL-2b</i></li> </ul>	<ul style="list-style-type: none"> <li>Initiate activities that interest them and try to get others involved. <i>APL-2c</i></li> <li>Use toys and other objects to make things happen (kick a ball, push a button on a toy). <i>APL-2d</i></li> <li>Move toward people and things that are new and/or interesting. <i>APL-2e</i></li> </ul>	<ul style="list-style-type: none"> <li>Seek more information about people and their surroundings (“study” an object carefully, stare for long moments, become absorbed in figuring out a situation). <i>APL-2f</i></li> <li>Use their whole body to learn (get mud or paint on themselves from head to toe, fit themselves into a big, empty box). <i>APL-2g</i></li> <li>Communicate what they want to do or know using gestures, facial expressions, or words (ask “What dat?”). <i>APL-2h</i></li> </ul>	<ul style="list-style-type: none"> <li>Ask questions about the people and things around them. <i>APL-2i</i></li> <li>Use all available senses, tools, and a variety of strategies to explore the environment (drop objects in water to see if they sink or float). <i>APL-2j</i></li> <li>Purposely try different ways of doing things to see what and how they work (adjust blocks used as a ramp to make a ball roll faster and farther). <i>APL-2k</i></li> </ul>	<ul style="list-style-type: none"> <li>Ask questions to find out more about the things that interest them, including questions about future events. <i>APL-2l</i></li> <li>Choose among different ways to explore the environment based on past experience (use a magnifying glass that the class used before to explore something new). <i>APL-2m</i></li> <li>Use what they know from past experience to understand what is happening now (get an umbrella to go outside because it is raining). <i>APL-2n</i></li> </ul>

# Curiosity, Information-Seeking, and Eagerness

1. Provide safe spaces and remove dangerous items indoors and outdoors so infants and toddlers can explore safely. Use soft surfaces, light colors, and comfortable furniture to create a warm, inviting classroom atmosphere.
2. Provide children with the means to represent their ideas with more than one type of material or medium (e.g., painting, drawing, blocks).
3. Choose materials that appeal to children's senses (smell, touch, hearing, sight, and taste) to encourage children to react and move. For example, place colorful toys around an infant during tummy time, hang wind chimes outdoors, or invite toddlers to smell flowers. Be sensitive to infants and toddlers with special sensory needs. Avoid overwhelming children with stimulation. Provide quiet, uncluttered spaces when children need them.
4. Offer toys and activities that are challenging and exciting for each child at his or her individual level. When children express interest, show them what toys will do and how materials can be used.
5. Allow children to make choices when possible (such as materials and activities). For some children with disabilities, caregivers must introduce toys, begin activities, and play a more active role to show them what to do. Follow children's signals to decide whether to continue, vary, or end an activity.
6. Show enthusiasm for children's discoveries. Talk with them about what they are experiencing and what is happening around them. Notice and respond to infants when they react to what is happening and encourage them to notice each other's activities. Set an example by sharing children's excitement in discovery and exploration on their level (e.g., digging through snow in winter to see if the grass is still there; looking for flower buds in spring and yellowing leaves in fall).
7. Make a wide variety of experiences available to all infants and toddlers, including children with disabilities. Encourage children to use multiple senses (touching, smelling, looking) to explore a variety of materials and experiences (children's artwork, wall hangings, tapestry, weavings, arrangements of flowers and leaves, great paintings, sculpture, mosaics, different types of music such as classical, dance, jazz, and/or folk, etc.).
8. Talk about the things you like and share your enjoyment in learning new things, trying new activities, etc.
9. Set an example by thinking out loud when actively solving a dilemma or figuring something out.
10. Ask children to communicate what they like, dislike, and enjoy. Use actions, facial expressions, and/or words to reflect what a child seems to be communicating.

# Curiosity, Information-Seeking, and Eagerness

1. Provide a wide variety of objects, experiences, and materials for exploration. Provide both familiar and new materials in response to children's interests. Include materials that are found in their homes. Make sure materials are accessible for non-mobile children to look at, listen to, reach for, and touch. Adapt materials (e.g., location, texture, color, etc.) as needed to ensure all children can use them.
2. Furnish materials that will facilitate the re-creation of memories or experiences that a child can share and encourage a spirit of inquiry.
3. Listen and respond to children as they share their thoughts (e.g., open up a discussion of what happened in a class meeting). Provide props (such as an object from the activity being discussed) and pictures to make it easier for children with limited vocabulary or who speak a home language other than English to participate.
4. Provide plenty of time for children to explore and play at their own pace, indoors and outside.
5. Encourage children to share ideas and ask questions of one another. Encourage curiosity by asking open-ended questions (for example, "What will happen when we add the water to the flour?" "What is the man in the picture trying to do?").
6. Give children many opportunities to experience beauty through all their senses (touching snow, looking at rainbows, smelling freshly mowed grass, tasting different foods, listening to birds chirp). For older children, put illustrated coffee-table books in the classroom's book area.
7. Visit different types of places so that children have a variety of experiences (such as local museums, parks, grocery stores, the post office, etc.).
8. Talk about the things you like and share your enjoyment in learning new things, trying new activities, etc.
9. Set an example by thinking out loud when actively solving a dilemma or figuring something out.
10. Ask children to communicate what they like, dislike, and enjoy. Use actions, facial expressions, and/or words to reflect what a child seems to be communicating.

# Play and Imagination

## Goal APL-3: Children engage in increasingly complex play.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Show interest in other children playing (watch, turn toward). <i>APL-3a</i></li> <li>• Imitate sounds, facial expressions, or gestures (cover face with hands, hands up for “so big”). <i>APL-3b</i></li> <li>• Play with simple objects, using them to make sounds and other interesting results. <i>APL-3c</i></li> <li>• Begin to participate in give-and-take exchanges of sounds and gestures (“serve and return”). <i>APL-3d</i></li> </ul>	<ul style="list-style-type: none"> <li>• Play alongside other children, sometimes imitating their actions. <i>APL-3e</i></li> <li>• Imitate adult actions with objects, first with real objects and then with objects that are used to represent another object (talk on phone, feed doll, use a chair as pretend car). <i>APL-3f</i></li> <li>• Take turns in simple games (pat-a-cake, peek-a-boo). <i>APL-3g</i></li> <li>• Offer toys and objects to others. <i>APL-3h</i></li> </ul>	<ul style="list-style-type: none"> <li>• Try to involve other children in play. <i>APL-3i</i></li> <li>• Make believe, pretend, and act out familiar life scenes, sometimes using objects to represent something else (a shoe becomes a phone). <i>APL-3j</i></li> <li>• Play with others with a common purpose (play a chase game). <i>APL-3k</i></li> <li>• Communicate about what is happening during pretend play (“He eating,” point to a picture on a communication board when feeding a toy baby with a spoon; “Now go work,” after putting on shoes and necktie). <i>APL-3l</i></li> </ul>	<ul style="list-style-type: none"> <li>• Engage in dramatic play themes that include interacting with other children, but often are not coordinated. <i>APL-3m</i></li> <li>• Talk to peers and share materials during play. <i>APL-3n</i></li> <li>• Engage in make-believe play with imaginary objects. <i>APL-3o</i></li> <li>• Use language to begin and carry on play with others. <i>APL-3p</i></li> <li>• Express knowledge of their everyday lives and culture through play (uses chopsticks to eat, pretends to fix hair the way his/her family styles hair). <i>APL-3q</i></li> </ul>	<ul style="list-style-type: none"> <li>• Develop and sustain more complex pretend play themes in cooperation with peers. <i>APL-3r</i></li> <li>• Use more complex and varied language to share ideas and influence others during play. <i>APL-3s</i></li> <li>• Choose to use new knowledge and skills during play (add features to dramatic play scene related to class project, write list, build structure like displayed picture). <i>APL-3t</i></li> <li>• Demonstrate their cultural values and “rules” through play (tells another child, “That’s not what mommies do.”). <i>APL-3u</i></li> </ul>

## Goal APL-4: Children demonstrate creativity, imagination, and inventiveness.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Use everyday household objects for play (spoons, pots and pans, plastic bowls). <i>APL-4a</i></li> <li>• Try a familiar action with a new object or person (try to bounce a block, wave bye-bye to a toy, make a sound to get a new adult's attention). <i>APL-4b</i></li> <li>• React to unexpected events with laughter and interest. <i>APL-4c</i></li> </ul>	<ul style="list-style-type: none"> <li>• Do new things with familiar objects or combine them in unusual ways (use a dress-up boa as a snake, pound a drum with a plastic bottle, try to stack bears). <i>APL-4d</i></li> </ul>	<ul style="list-style-type: none"> <li>• Do new things with familiar objects or combine them in unusual ways (use a dress-up boa as a snake, pound a drum with a plastic bottle, try to stack bears). <i>APL-4e</i></li> <li>• Pretend to be somebody or something other than themselves. <i>APL-4f</i></li> <li>• Pretend one object is really something different (use Legos® as food while stirring a pot). <i>APL-4g</i></li> </ul>	<ul style="list-style-type: none"> <li>• Offer new ideas about how to do or make things. <i>APL-4h</i></li> <li>• Add new actions, props, or dress-up items to pretend play. <i>APL-4i</i></li> <li>• Use materials (e.g., art materials, instruments, construction, writing implements) or actions to represent experiences or ideas in novel ways. <i>APL-4j</i></li> <li>• Experiment with language, musical sounds, and movement. <i>APL-4k</i></li> </ul>	<ul style="list-style-type: none"> <li>• Plan play scenarios (dramatic play, construction), and use or create a variety of props or tools to enact them. <i>APL-4l</i></li> <li>• Expand the variety of roles taken during dramatic play and add more actions, language, or props to enact roles. <i>APL-4m</i></li> <li>• Use materials or actions in increasingly varied and resourceful ways to represent experiences or ideas. <i>APL-4n</i></li> <li>• Make up stories, songs, or dances for fun during play. <i>APL-4o</i></li> </ul>

The environment has a big effect on how children demonstrate creativity and imagination. Teachers and caregivers can encourage creativity and imaginative play by modeling or demonstrating creativity, and by offering children many opportunities for pretend play.

# Play and Imagination

1. Accept getting messy as part of a child's learning.
2. Look and plan for children's differences and their many ways of learning. Use real objects, pictures, music, language, books, the outdoors, active play, quiet activities, and group activities to appeal to children who learn in different ways.
3. Provide materials that can be used in more than one way and encourage children to think of different ways to use them. Encourage trial and error and provide children with adequate time to fully explore materials.
4. Encourage children to notice what others are doing when they are pretending. ("See the way Maya is using the block for a race car." "Look at Luis and Mary. They are pretending to bake a cake.")
5. Include unusual art and music materials when planning creative activities for children (for example, jumping on bubble wrap, painting with feet, using classroom items such as blocks and toy pots to make music or create rhythm).
6. Allow and encourage children to solve problems in their own ways.
7. Encourage children to help you make up silly stories so they use their imagination.
8. Make accommodations to the environment and materials to allow opportunities for children with varying abilities and physical needs to fully participate.

## Strategies for Preschoolers

# Play and Imagination

1. Encourage children to think about new ideas. (“Have you ever wondered where snow goes?” “Where do birds live?”)
2. Provide a wide range of experiences. For preschoolers, include some experiences in which the goal is to try many different approaches rather than finding one “right” solution.
3. Foster cooperative play and learning groups. Stay involved in the children’s play and learning groups to help children who may be less likely to join in because they don’t communicate as well as other children—ask questions, make suggestions, and draw each child into the play and other activities.
4. Promote the integrated use of materials throughout activities and centers. (“Let’s get some paper from the writing center to make signs for the city you made in the block center.”)
5. Challenge children to consider alternative ideas and endings of stories.
6. Help children accommodate and build on one another’s ideas to achieve common goals (e.g., suggest that individual block structures can be put together to make a much larger one).
7. Provide materials for preschoolers to pretend, to use one object to represent another, and to take on roles. This includes dress-up clothes for a variety of play themes and toys that can be used for many things, such as blocks, scarves, and clay.
8. Look and plan for children’s differences and their many ways of learning. Use real objects, pictures, music, language, books, the outdoors, active play, quiet activities, and group activities to appeal to children who learn in different ways.
9. Watch for and acknowledge increasing complexity in a child’s play. (“Your tower of blocks became a fire station, and now you’ve built a whole town.”)

# Risk-Taking, Problem-Solving, and Flexibility

**Goal APL-5: Children are willing to try new and challenging experiences.**

## Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Explore new experiences both indoors and outdoors (toys, foods, people, spaces) with support of a familiar trusted adult. <i>APL-5a</i></li> <li>Try to do things that are hard for them (stretch to reach toy, work to crawl or walk, try to capture tiny crumb with pincer grasp). <i>APL-5b</i></li> <li>Look to adult for cues and when reassured, proceed. <i>APL-5c</i></li> </ul>	<ul style="list-style-type: none"> <li>Try unfamiliar experiences and interact with new people, with a familiar adult nearby. <i>APL-5d</i></li> <li>Move away from a familiar adult to explore, but check in frequently. <i>APL-5e</i></li> <li>Show interest in toys that offer a challenge and try to work them. <i>APL-5f</i></li> </ul>	<ul style="list-style-type: none"> <li>Explore freely without a familiar adult nearby. <i>APL-5g</i></li> <li>Try out new skills in a familiar environment (learn to climb steps and then try to climb ladder to the slide). <i>APL-5h</i></li> <li>Approach a challenge with confidence (try to lift a heavy object, work on a difficult puzzle, "I can do it."). <i>APL-5i</i></li> <li>Want to do things their own way (say "Me do it!", push an adult's hand away if the person is trying to help). <i>APL-5j</i></li> </ul>	<ul style="list-style-type: none"> <li>Express a belief that they can do things that are hard. <i>APL-5k</i></li> <li>Choose to participate in an increasing variety of familiar and new experiences. <i>APL-5l</i></li> <li>Accept new challenges when offered. <i>APL-5m</i></li> <li>Try things they are not sure they can do, while avoiding dangerous risks. <i>APL-5n</i></li> </ul>	<ul style="list-style-type: none"> <li>Express a belief that they can do things that are hard. <i>APL-5o</i></li> <li>Approach new experiences independently. <i>APL-5p</i></li> <li>Ask to participate in new experiences that they have observed or heard about. <i>APL-5q</i></li> <li>Independently seek new challenges. <i>APL-5r</i></li> </ul>

Temperament influences the way children approach new or challenging tasks and situations. Depending on their temperament, some children will approach new or challenging tasks and situations with enthusiasm, while others will be more wary and cautious. If a child is not a risk taker, it is important for teachers and caregivers to look for opportunities to build the child's confidence by noticing times when he or she tries something new or challenging.

## Goal APL-6: Children use a variety of strategies to solve problems.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Try one or two strategies to get what they want (make noise, move or reach toward things, reject unwanted item). <i>APL-6a</i></li> <li>Try a familiar action in a new activity (hit a button on a new toy, try to open a visitor's purse). <i>APL-6b</i></li> <li>Use trial and error to get something done, get what they want, or solve simple problems. <i>APL-6c</i></li> </ul>	<ul style="list-style-type: none"> <li>Try one or two strategies to get what they want or solve a problem (try giving a peer an alternate toy to get a toy from him/her; try to put a ball in a box—if it will not fit, gets a bigger box). <i>APL-6d</i></li> <li>Use available resources to accomplish a goal or solve a problem (push a stool to a counter to reach for something). <i>APL-6e</i></li> <li>After unsuccessful attempt to solve a problem, ask for help from an adult (point, gesture, speak). <i>APL-6f</i></li> <li>Vary actions on purpose to solve a problem (bang, then turn shape to fit in sorter; shake handle, then pull, to open a drawer). <i>APL-6g</i></li> </ul>	<ul style="list-style-type: none"> <li>Try a variety of strategies to get what they want or solve a problem. <i>APL-6h</i></li> <li>Use language to obtain help to solve a problem (tell adults, "My car broke."). <i>APL-6i</i></li> <li>Use materials in new ways to explore and solve problems (bring a big spoon to the sand table when all of the shovels are in use, pile blocks on a towel and drag them across the floor when there are too many to carry). <i>APL-6j</i></li> </ul>	<ul style="list-style-type: none"> <li>Seek and make use of ideas and help from adults and peers to solve problems ("How can I make this paint get off my pants?"). <i>APL-6k</i></li> <li>Purposefully use a variety of strategies to solve different types of problems. <i>APL-6l</i></li> <li>Talk to themselves to work through the steps to solve a problem. <i>APL-6m</i></li> </ul>	<ul style="list-style-type: none"> <li>Seek and make use of ideas and help from adults and peers to solve problems ("How can I make this paint get off my pants?"). <i>APL-6n</i></li> <li>Describe the steps they will use to solve a problem. <i>APL-6o</i></li> <li>Evaluate different strategies for solving a problem and select the strategy they feel will work without having to try it. <i>APL-6p</i></li> <li>Explain how they solved a problem to another person. <i>APL-6q</i></li> </ul>

# Risk-Taking, Problem-Solving, and Flexibility

1. Provide challenging, high-quality tools and equipment and an abundant supply of thought-provoking, complex materials that can be used in more than one way (e.g., blocks or clay) and are not limited to a single “right” use.
2. Show genuine care, affection, and kindness toward children (e.g., validate their disappointment when a block structure falls down; encourage them to figure out what happened and rebuild). Your support gives children the confidence to take risks.
3. Allow children to do things their own way and take some risks. Intervene when needed to keep children safe.
4. Show pleasure in what children have done. Respond to their expressions of accomplishment. (“You have a big smile on your face! You look happy that you went down the slide all by yourself.”)
5. Model flexibility and acceptance of mistakes or failures. (“Oops, that didn’t work! Let’s try something else.”)
6. Establish a regular yet flexible routine.
7. Recognize that some children have difficulty trying new things, using a toy in a different way, or varying their routines. Try different ways to introduce change and variety (provide advance warning of changes in routine, use pictures for what will happen next, model new ways of using materials). Gradual change is usually best. Work with other professionals to learn strategies that help these children try new things and accept changes when needed.
8. Plan for and recognize different interest levels and abilities to tolerate materials, mistakes, and engagement with other children. Accommodate these differences by being flexible and introducing more challenging experiences gradually.

# Risk-Taking, Problem-Solving, and Flexibility

1. Seek and accept children's ideas. Let them know that their thinking and their efforts are valued more than "getting the right answer."
2. Recognize that "mistakes" are inevitable and treat them as opportunities to learn. Help children deal with mistakes in a positive way. Avoid criticizing or making fun of them.
3. Set an example by acknowledging one's own "mistakes" and modeling constructive reactions to them. Model for children by talking about what you are doing as you remain calm, figuring out what went wrong, and trying again.
4. Help children think and talk through different approaches to problems (e.g., when their favorite game isn't available, encourage them to consider another choice).
5. Encourage children to share, listen, and ask questions of one another and compare strategies and solutions. Support children with varying communication abilities by supporting a variety of ways for children to share, ask questions, and compare.
6. Recognize that some children have difficulty trying new things, using a toy in a different way, or varying their routines. Try different ways to introduce change and variety (provide advance warning of changes in routine, use pictures for what will happen next, model new ways of using materials). Gradual change is usually best. Work with other professionals to learn strategies that help these children try new things and accept changes when needed.
7. Plan for and recognize different interest levels and abilities to tolerate materials, mistakes, and engagement with other children. Accommodate these differences by being flexible and introducing more challenging experiences gradually.
8. Ask probing questions when children appear to be confused to bring them to a greater understanding.

# Attentiveness, Effort, and Persistence

## Goal APL-7: Children demonstrate initiative.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Communicate with sounds or movements to indicate preferences (make excited sound for food they like, push away food they don't like). <i>APL-7a</i></li> <li>Independently explore the different qualities of an object (notice the sound of a rattle, then be drawn to the "feel" of it, exploring it with mouth or hand). <i>APL-7b</i></li> </ul>	<ul style="list-style-type: none"> <li>Express choices with actions or simple language (choose Cheerios® or a cracker). <i>APL-7c</i></li> <li>Seek to repeat experiences they enjoy or succeed at (do shape sorter over and over, climb up and down stairs). <i>APL-7d</i></li> </ul>	<ul style="list-style-type: none"> <li>Select and carry out activities (choose to set the table; gather play dishes and food, and then feed the dolls). <i>APL-7e</i></li> <li>Show increasing interest in performing tasks independently (put on jacket and try to zip it up). <i>APL-7f</i></li> <li>Show and/or tell others what they have done. <i>APL-7g</i></li> </ul>	<ul style="list-style-type: none"> <li>Show increasing independence and purpose when making choices ("I want to go to blocks."). <i>APL-7h</i></li> <li>Express goals or plans and follow through on them ("I'm going to draw my house."). <i>APL-7i</i></li> </ul>	<ul style="list-style-type: none"> <li>Show increasing independence and purpose when making choices ("I'm going to the block area to make a track for my race car."). <i>APL-7j</i></li> <li>Independently identify and seek things they need to complete activities or tasks (gather supplies and make a birthday card with a message). <i>APL-7k</i></li> <li>Set simple goals that extend over time, make plans and follow through ("Let's make a rocket ship. We need blocks."). <i>APL-7l</i></li> </ul>

Children's willingness to demonstrate initiative varies based on their personality or temperament and familial and cultural differences. Some cultures value children who demonstrate initiative, while others may place a low priority on initiative. Some children are less likely to demonstrate initiative because they are shy or prefer to join an activity that is already going on in the classroom rather than initiate a new activity or interaction.

## Goal APL-8: Children maintain attentiveness and focus.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Focus and attend to people and things around them. <i>APL-8a</i></li> <li>• Repeat interesting actions over and over (push button to make toy pop up). <i>APL-8b</i></li> <li>• Notice when the expected does not happen. <i>APL-8c</i></li> </ul>	<ul style="list-style-type: none"> <li>• Focus on self-selected activity for a short period of time (decide to play in the sandbox and stay there for a couple of minutes). <i>APL-8d</i></li> <li>• Focus on an interesting activity or interaction shared with adults for a short period of time. <i>APL-8e</i></li> </ul>	<ul style="list-style-type: none"> <li>• Focus on a person or a hands-on activity for a short period of time (participate in singing a song, stay focused long enough to build a block tower). <i>APL-8f</i></li> <li>• Keep working on interesting activities with other things going on around them. <i>APL-8g</i></li> </ul>	<ul style="list-style-type: none"> <li>• Focus on age-appropriate activities for a short period of time, even with interruptions (continue working on a puzzle even though another child sitting nearby is laughing and talking). <i>APL-8h</i></li> <li>• Remain engaged in more complex activities that they have chosen. <i>APL-8i</i></li> <li>• Maintain focus and return to an activity after a break. <i>APL-8j</i></li> </ul>	<ul style="list-style-type: none"> <li>• Sometimes able to ignore irrelevant information when focusing on a task (sort multicolored wooden beads by shape). <i>APL-8k</i></li> <li>• Consistently remain engaged in self-directed activities. <i>APL-8l</i></li> </ul>

Generally, young children have short attention spans; however, by age 4, children can usually pay attention to a toy or other activity for 8-10 minutes. They can also shift their attention back and forth between their activity and an adult talking to them, and may be paying attention even when it does not look like they are. Brief opportunities for children to practice focusing on an activity or experience are helpful, but only for very short periods of time.

## Goal APL-9: Children persist at challenging activities.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Try over and over to make things happen (make sounds to get attention, work to get to something that is out of reach). <i>APL-9a</i></li> </ul>	<ul style="list-style-type: none"> <li>Keep trying to accomplish tasks that they are not able to do immediately (put on a jacket, engage a busy adult in play). <i>APL-9b</i></li> </ul>	<ul style="list-style-type: none"> <li>Seek help from others to complete a challenging activity. <i>APL-9c</i></li> <li>Keep working on an activity even after setbacks (block structure collapses, puzzle piece does not fit). <i>APL-9d</i></li> </ul>	<ul style="list-style-type: none"> <li>Seek help from others to complete a challenging activity (ask a teacher for help putting a puzzle away on a high shelf; ask a friend for help in naming an unfamiliar animal in a picture). <i>APL-9e</i></li> <li>When something does not work, try different ways to complete the task (when a block tower falls, try putting the blocks together in a different way to build the tower again). <i>APL-9f</i></li> <li>Keep working to complete tasks, including those that are somewhat difficult. <i>APL-9g</i></li> </ul>	<ul style="list-style-type: none"> <li>Seek help from others to complete a challenging activity (ask a teacher for help putting a puzzle away on a high shelf; ask a friend for help in naming an unfamiliar animal in a picture). <i>APL-9h</i></li> <li>When something does not work, try different ways to complete the task (when a block tower falls, try putting the blocks together in a different way to build the tower again). <i>APL-9i</i></li> <li>Plan and follow through on longer-term tasks (planting a seed and caring for the plant). <i>APL-9j</i></li> <li>Keep trying until a challenging activity is complete despite distractions or interruptions (multi-piece puzzle started before lunch and completed later). <i>APL-9k</i></li> </ul>

### Attentiveness, Effort, and Persistence

1. Furnish the classroom with a variety of materials that allow children with diverse interests and abilities to experience success.
2. Set up clearly defined interest areas that provide an abundant supply of toys and materials so that children can carry out ideas without interruption and frustration. Organize the space in a way that allows children who want to work on meaningful activities for extended periods of time to be protected from other children accidentally destroying what they are working on.
3. Plan for smooth transitions when moving children from one activity to another (lunch to nap, center time to cleanup to snack). Let children know ahead of time when transitions are coming so they can begin to finish what they are doing.
4. Provide a variety of activities and materials that offer challenges appropriate to each child's age and ability level. Encourage each child to try hard, to try different ways of doing things, and to experience challenges.
5. Add new things to the indoor and outdoor environment for children to notice (e.g., windsocks and flags that move in the breeze, bird feeders outside the window, new photographs of family members).
6. Allow children to use materials in their own ways and for extended periods of time. However, keep in mind that some children (e.g., children with disabilities) may use materials in ways that do not help their development. Learn how to respond appropriately to this behavior.

# Attentiveness, Effort, and Persistence

1. Provide large, uninterrupted blocks of time for children to play, explore materials, and solve problems at their own pace. Allow children to repeat activities and experiences, and to be involved in activities without interruption.
2. Plan projects that are completed over the course of several days.
3. Help children with limited language skills stay involved with activities by giving them words and other means to communicate if they are having difficulty expressing their ideas or staying focused on an activity.
4. When children indicate they need help, respond by listening and observing to determine what kind of help is needed. Offer help when children show they want and need it, adjusting levels of help to fit the situation and child's abilities.
5. Ask probing questions when children appear to be losing interest in a problem or activity to help them stay focused for just a bit longer.
6. Encourage children to keep working and focus on effort rather than results. Show that you value their thinking processes by acknowledging their work and effort. ("Look how long and hard you worked on this.")
7. Help children notice each other's contributions. Encourage them to listen carefully to what others in the class are saying, ask questions, and work together.

# Emotional and Social Development (ESD)

Subdomains
Developing a Sense of Self
Developing a Sense of Self With Others
Learning About Feelings

**T**he **Emotional and Social Development** domain includes children's feelings about themselves and their relationships with others. Learning to manage and express emotions is also a part of this domain. Children's development in this domain affects their development in every other domain. For instance, children who develop a positive sense of self are more likely to try new things and work toward reaching goals. They tend to accept new challenges and feel more confident about their ability to handle problems or difficulties that may come up.

Children's social skills and the relationships they form with others are also important for their overall development. Early relationships provide the basis for children's later relationships with teachers and with peers. Through positive relationships with adults, children learn to understand and care about others and gain skills that help them have an easier time adjusting to the demands of formal schooling when they are older. Sensitive interactions with teachers and caregivers are particularly important for infants and toddlers because they are learning to form attachments, or strong ties to people who care for them. These attachment relationships are the foundation for children's development in all

areas. When adults pay attention to children's emotional and social cues and respond consistently and with positive regard, children feel important. They also learn to feel good about themselves and to relate positively with others.

Children also learn to manage their feelings and impulses during their early years of life. Very young children (infants and toddlers) often need the support of sensitive adults to learn how to regulate their emotions. As children grow, their ability to regulate and manage emotions is developing, but they often still have difficulties controlling their feelings.

A number of factors affect children's emotional and social development. A child's temperament plays a big role in how she or he expresses emotions and relates to others. Temperament is the unique way a child responds to the world around him or her. Some children may be generally happy and very friendly, while others may be more withdrawn or shy. Sensitive teachers and caregivers accept that children respond differently to people and new situations based on their temperament, and learn to interact with children in ways that match each child's temperament to support their emotional and social development.

In addition to temperament, children have other characteristics and experiences that can affect their social and emotional development. Children with disabilities may need additional support in learning to express their emotions and/or develop positive relationships. For instance, a child with sensory impairments, such as vision and hearing loss, may need specialized assistance to develop a strong sense of self and/or form relationships with other children. Children who are learning

English in addition to their home language may need some help communicating with peers who do not speak their home language. Teachers and caregivers must be “in tune” with each child as an individual in order to fully support children’s emotional and social development.

Finally, a child’s family and culture play an important role in emotional and social development. Some families and cultures encourage children to be more reserved,

while others may encourage children to be more outgoing. Cultures and families also have different expectations for other areas of emotional and social development, such as expectations for how children communicate, the degree to which children are expected to be assertive, and the way that children show respect to adults. Teachers and caregivers should keep these types of cultural differences in mind as they support children’s emotional and social development.

## Emotional and Social Development (ESD)

### **Developing a Sense of Self**

- Goal ESD-1: Children demonstrate a positive sense of self-identity and self-awareness.
- Goal ESD-2: Children express positive feelings about themselves and confidence in what they can do.

### **Developing a Sense of Self With Others**

- Goal ESD-3: Children form relationships and interact positively with familiar adults who are consistent and responsive to their needs.
- Goal ESD-4: Children form relationships and interact positively with other children.
- Goal ESD-5: Children demonstrate the social and behavioral skills needed to successfully participate in groups.

### **Learning About Feelings**

- Goal ESD-6: Children identify, manage, and express their feelings.
- Goal ESD-7: Children recognize and respond to the needs and feelings of others.

# Developing a Sense of Self

## Goal ESD-1: Children demonstrate a positive sense of self-identity and self-awareness.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Show awareness of their bodies (study own hands and feet moving; use hands, mouth, and eyes in coordination to explore their bodies). <i>ESD-1a</i></li> <li>• Show interest in their image in a mirror (stare, smile, reach out to touch). <i>ESD-1b</i></li> <li>• Respond to their name with sounds or movement. <i>ESD-1c</i></li> <li>• Express likes and dislikes (smile, cry, and protest). <i>ESD-1d</i></li> </ul>	<ul style="list-style-type: none"> <li>• Show awareness of specific body parts. <i>ESD-1e</i></li> <li>• Recognize themselves in a mirror (point to self, make faces in mirror). <i>ESD-1f</i></li> <li>• Express choices with gestures, signs, or words (select a toy they want). <i>ESD-1g</i></li> </ul>	<ul style="list-style-type: none"> <li>• Show awareness of some of their own characteristics and things they can do (recognize themselves in pictures, say, "I help Daddy!"). <i>ESD-1h</i></li> <li>• Use their own name or a personal pronoun to refer to themselves (I, me, and mine). <i>ESD-1i</i></li> <li>• Make choices and have favorite clothes, toys, and activities. <i>ESD-1j</i></li> </ul>	<ul style="list-style-type: none"> <li>• Describe self (characteristics that can be seen, things they can do, things they like, possessions). <i>ESD-1k</i></li> <li>• Express a sense of belonging to a group (say "There's Kirby from my class," move to stand with own group upon request, "I am a girl."). <i>ESD-1l</i></li> <li>• Use own first and last name. <i>ESD-1m</i></li> <li>• Choose activities they like and name their favorite activities. <i>ESD-1n</i></li> </ul>	<ul style="list-style-type: none"> <li>• Describe themselves in concrete ways, with greater detail and accuracy ("My eyes are brown." "I am tall."). <i>ESD-1o</i></li> <li>• Express awareness that they are members of different groups (e.g., family, preschool class, ethnic group). <i>ESD-1p</i></li> <li>• Choose to spend more time on preferred activities, and express awareness of skills they are developing. <i>ESD-1q</i></li> </ul>

## Goal ESD-2: Children express positive feelings about themselves and confidence in what they can do.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Show they expect results from their actions (repeat loud noise to gain attention, hit toy over and over to produce sound). <i>ESD-2a</i></li> <li>• Show pleasure at things they have done (wiggle, coo, laugh). <i>ESD-2b</i></li> <li>• Explore the environment with support from a familiar, trusted adult. <i>ESD-2c</i></li> </ul>	<ul style="list-style-type: none"> <li>• Explore the environment on their own, but check in with a familiar, trusted adult occasionally. <i>ESD-2d</i></li> <li>• Show confidence in their ability to make things happen by repeating or changing their actions to reach a goal (move closer to reach an object they want). <i>ESD-2e</i></li> <li>• Bring others things they like or show them things they have done. <i>ESD-2f</i></li> </ul>	<ul style="list-style-type: none"> <li>• Express positive feelings about themselves by showing and/or telling others about themselves, things they like, or things they have done. <i>ESD-2g</i></li> <li>• Explore the environment independently to satisfy their own interests (seek out toy or favorite materials). <i>ESD-2h</i></li> <li>• Show confidence in their abilities through actions and/or language (try to lift a heavy object, say, "I'm strong!"). <i>ESD-2i</i></li> <li>• Attempt to reach goals without help from others (push adult away, say "Me do it myself!"). <i>ESD-2j</i></li> </ul>	<ul style="list-style-type: none"> <li>• Express positive feelings about themselves by showing and/or telling others about themselves, things they like, or things they have done. <i>ESD-2k</i></li> <li>• Express the belief that they can do many things. <i>ESD-2l</i></li> <li>• Try new activities and attempt new challenges. <i>ESD-2m</i></li> </ul>	<ul style="list-style-type: none"> <li>• Express positive feelings about themselves by showing and/or telling others about themselves, things they like, or things they have done. <i>ESD-2n</i></li> <li>• Express the belief that they can do many things. <i>ESD-2o</i></li> <li>• Stick with tasks even when they are challenging. <i>ESD-2p</i></li> <li>• Express opinions about their abilities in different areas ("I'm a good friend." "I can run fast." "I know all my letters!"). <i>ESD-2q</i></li> </ul>

Home language and culture are an important part of children's developing self-concept and self-identity. Teachers and caregivers can help to support this process by creating an environment that reflects the children they serve and addresses children's languages and cultures in a respectful and authentic way.

# Developing a Sense of Self

1. Observe children carefully. Learn how each child prefers to be held for feeding, sleeping, or comforting and how he or she reacts to things like noise, light, or touch. Also, ask parents or guardians. Use what you learn to provide consistent, predictable care and help each child be comfortable. Share what you know with others who care for the child.
2. Keep brief notes on each child to help you remember the unique needs of each individual child. Use this information as you plan how you will care for the child.
3. Take plenty of time to interact with each infant in a relaxed way during everyday caregiving routines such as diapering, dressing, and feeding. Plan ahead so that you have everything you need (such as supplies and clean hands) before you start routines. Then you can focus only on the child.
4. Hold and talk to babies individually throughout the day, not only during diapering, dressing, and eating times. Cuddle them while reading a book or playing with a toy.
5. If possible, use children's home language in daily conversations with them.
6. Talk with infants as you watch them explore their bodies. For example, say, "Look, at your hands, Jalen. You are moving your fingers."
7. Be on the floor with children. Support and encourage them by making eye contact and talking with them.
8. Offer a comfort object such as a favorite blanket or stuffed animal to help a child feel secure when he or she is stressed.
9. Place unbreakable mirrors in different areas of the room so children get to see themselves often (for example, above the changing table and on the walls at child's eye level).
10. Try to avoid telling children "no" by giving them choices that are OK. Give them many chances to make choices and decisions. For example, if a toddler tries to grab a toy from another child, offer two other similar toys to choose from. Offer two different snacks, or let children choose which book to read.
11. Respect toddlers when they try to get what they want or do something their own way. Be patient, give them time to work at things, and encourage them to communicate what they want.

# Developing a Sense of Self

1. Help establish a sense of trust and security by developing warm and responsive relationships with every child. Greet each of them by name daily. Through smiles or friendly gestures, show you are pleased to see them.
2. Respect individual temperaments and personal uniqueness and be aware of any personal circumstances in a child's life.
3. Encourage children to express their feelings through appropriate words and actions.
4. Communicate often with children, both individually and in small groups. Listen to what they are saying and show you value their opinions by acknowledging them and building on their ideas.
5. Involve children in planning related to the classroom (e.g., ask for and use their ideas about visual displays, book selections, and activities).
6. If possible, use children's home language in daily conversations with them.
7. Help children identify themselves as unique individuals and as members of different groups (e.g., create and display family photo books; ask the children to describe something that is special about another child; put a full-length mirror in the classroom; use given names and pronounce them correctly).
8. Design the classroom in a way that stimulates and challenges children and gives them choices that are appropriate for a range of ages, developmental stages, and abilities (e.g., freshen materials in activity centers to reflect emerging themes generated by children and children's interests).
9. Support the growth of children's feelings of competence and self-confidence (e.g., use books and games they create; provide access to materials that encourage them to stretch their abilities; provide positive comments about their accomplishments).
10. Allow children to experiment without fear of criticism or danger. Treat mishaps such as spilling, dropping, or knocking over objects as opportunities for positive learning.
11. Make the classroom environment safe, pleasant, and joyful. Promote the use of humor and singing.
12. Make room in the classroom for cozy, safe areas where children can be alone if they wish.
13. Get to know children's families and value them as partners. Invite their participation and input through comment cards, home visits, and casual conversation – especially when things are going well.

# Developing a Sense of Self With Others

**Goal ESD-3: Children form relationships and interact positively with familiar adults who are consistent and responsive to their needs.**

## Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Enjoy being held, cuddled, and talked to by familiar adults. <i>ESD-3a</i></li> <li>• Recognize and reach out to familiar people. <i>ESD-3b</i></li> <li>• Seek to be near their caregivers; stop crying when they come near. <i>ESD-3c</i></li> <li>• Show signs of separation anxiety when a familiar caregiver leaves. <i>ESD-3d</i></li> <li>• Make eye contact with others. <i>ESD-3e</i></li> <li>• Imitate sounds, facial expressions, or gestures they see other people do (peek-a-boo, hands up for “so big”). <i>ESD-3f</i></li> </ul>	<ul style="list-style-type: none"> <li>• Show preference for and emotional connection with adults who take care of them on a regular basis (“check in” with caregiver while playing, greet family member with big hug, seek out caregiver when upset or uncertain, exhibit anxiety when adult leaves). <i>ESD-3g</i></li> <li>• Offer toys and objects to familiar adults. <i>ESD-3h</i></li> </ul>	<ul style="list-style-type: none"> <li>• Form close relationships with their primary caregivers and other familiar adults. <i>ESD-3i</i></li> <li>• Seek help from trusted adults when upset (when fearful or having difficulty with something). <i>ESD-3j</i></li> <li>• Are less likely to get upset when primary caregiver is with them. <i>ESD-3k</i></li> <li>• Use words to influence caregivers’ behavior (ask for help, talk about something they want the adult to do). <i>ESD-3l</i></li> </ul>	<ul style="list-style-type: none"> <li>• Seek out trusted teachers and caregivers as needed (for emotional support, physical assistance, social interaction, problem-solving, and approval). <i>ESD-3m</i></li> <li>• Show affection for adults they are close to. <i>ESD-3n</i></li> <li>• Given time, form positive relationships with new teachers or caregivers. <i>ESD-3o</i></li> <li>• Show ease and comfort in their interactions with familiar adults. <i>ESD-3p</i></li> </ul>	<ul style="list-style-type: none"> <li>• Seek out trusted teachers and caregivers as needed (for emotional support, physical assistance, social interaction, problem-solving, and approval). <i>ESD-3q</i></li> <li>• Form positive relationships with new teachers or caregivers over time. <i>ESD-3r</i></li> <li>• Use language effectively to continue conversations with familiar adults and to influence their behavior (ask for help, ask an adult to do something). <i>ESD-3s</i></li> </ul>

Temperament also plays a role in children’s relationships. Depending on their temperament, some children may have an easy time meeting new people. Other children may be more hesitant and/or shy, and may need more time and support before they feel comfortable enough to interact with adults and peers.

## Goal ESD-4: Children form relationships and interact positively with other children.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Notice other infants and children (look at them, turn in other's direction, reach for them, touch them). <i>ESD-4a</i></li> </ul>	<ul style="list-style-type: none"> <li>Show pleasure at the arrival of familiar peers. <i>ESD-4b</i></li> <li>Enjoy playing alongside other children. <i>ESD-4c</i></li> <li>Imitate actions of older siblings and playmates. <i>ESD-4d</i></li> <li>Offer toys and objects to other children. <i>ESD-4e</i></li> </ul>	<ul style="list-style-type: none"> <li>Show affection or preference for particular children (spontaneously hug, want to play, call other child a friend). <i>ESD-4f</i></li> <li>Remember and use names of familiar playmates. <i>ESD-4g</i></li> <li>Use appropriate words to influence playmates' behavior ("Play with me." "Stop hitting me. "). <i>ESD-4h</i></li> <li>Participate in play with other children. <i>ESD-4i</i></li> <li>Show positive emotion and turn taking with familiar playmates (agree to chase each other, watch and imitate each other's play with toys). <i>ESD-4j</i></li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate social skills when interacting with other children (turn-taking, conflict resolution, sharing). <i>ESD-4k</i></li> <li>Form and maintain friendships with a few other children. <i>ESD-4l</i></li> <li>Identify another child as a friend. <i>ESD-4m</i></li> <li>Approach other children easily, expecting positive interactions. <i>ESD-4n</i></li> <li>Show ease and comfort in their interactions with familiar children. <i>ESD-4o</i></li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate social skills when interacting with other children (turn-taking, conflict resolution, sharing). <i>ESD-4p</i></li> <li>Form and maintain friendships with other children of diverse cultural backgrounds and abilities. <i>ESD-4q</i></li> <li>Seek and give support with children they identify as friends. <i>ESD-4r</i></li> <li>Use language effectively to have conversations with other children and influence another child's behavior (negotiate sharing a toy, plan how to build a block tower together). <i>ESD-4s</i></li> <li>Play and interact cooperatively with other children (work on project together, exchange ideas). <i>ESD-4t</i></li> </ul>

Children whose home language is different from the language spoken in the classroom may need extra time and support to develop peer relationships because it may be difficult to communicate with their peers. Teachers should also keep in mind that culture may play a role in children's relationships. Families differ in terms of the social skills and behaviors are valued and expected.

## Goal ESD-5: Children demonstrate the social and behavioral skills needed to successfully participate in groups.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<ul style="list-style-type: none"> <li>Use gestures, sounds, objects, or words to get another person to do something (bring box to adult to be opened, make noise to get someone to look). <i>ESD-5a</i></li> <li>Follow simple directions some of the time. <i>ESD-5b</i></li> <li>Control impulses some of the time (look at forbidden object and say, "No, no," allow adult to direct them to a different activity). <i>ESD-5c</i></li> <li>Accept adult help to resolve problems and conflicts, and cooperate when an adult redirects them from a situation that poses a problem. <i>ESD-5d</i></li> </ul>	<ul style="list-style-type: none"> <li>Follow social rules, transitions, and routines that have been explained to them, with reminders and practice. <i>ESD-5e</i></li> <li>Adjust their behavior to fit different situations (tiptoe near a sleeping baby, use a quiet voice inside, runs outside). <i>ESD-5f</i></li> <li>Evaluate their own and others' actions as right or wrong (pointing out another child is climbing on the table). <i>ESD-5g</i></li> <li>Show caring and cooperation (help to put away toys, offer to help another person). <i>ESD-5h</i></li> <li>Wait for a short time to get what they want (a turn with a toy, a snack), with guidance and support. <i>ESD-5i</i></li> <li>Accept "no" without getting overly upset. <i>ESD-5j</i></li> </ul>	<ul style="list-style-type: none"> <li>Follow social rules, transitions, and routines that have been explained to them, with reminders and practice. <i>ESD-5k</i></li> <li>Often make requests clearly and effectively. <i>ESD-5l</i></li> <li>Show awareness that their actions affect others (move carefully around classmate's block structure). <i>ESD-5m</i></li> <li>Wait for a short time to get what they want (a turn with a toy, a snack). <i>ESD-5n</i></li> <li>Work to resolve conflicts effectively, with guidance and support. <i>ESD-5o</i></li> <li>Notice and accept similarities and differences among all people, including people with disabilities and those from different cultures. <i>ESD-5p</i></li> </ul>	<ul style="list-style-type: none"> <li>Follow social rules, transitions, and routines that have been explained to them. <i>ESD-5q</i></li> <li>Make requests clearly and effectively most of the time. <i>ESD-5r</i></li> <li>Balance their own needs with those of others in the group. <i>ESD-5s</i></li> <li>Anticipate consequences and plan ways to solve problems effectively, with guidance and support. <i>ESD-5t</i></li> <li>Use a variety of strategies to solve problems and conflicts with increasing independence. <i>ESD-5u</i></li> <li>Express respect and caring for all people, including people with disabilities and those from different cultures. <i>ESD-5v</i></li> </ul>

Taking turns and waiting are important aspects of participating in a group. Generally, young children are not good at waiting. It is important that teachers try to minimize the amount of time children have to wait for materials and/or activities. To help encourage and support children's ability to wait, teachers can occasionally build in opportunities to practice waiting for very short periods of time.

# Developing a Sense of Self With Others

1. To promote attachment, allow only a small number of people to care for each young child regularly.
2. When there is more than one caregiver in the room, assign one specific person to be the primary caregiver for each young child. The primary caregiver should complete all of the child's daily caregiving routines, such as feeding and diapering. This helps the child develop a strong relationship with the caregiver and helps the caregiver learn about the uniqueness of the child. If the primary caregiver is absent, assign a person familiar to the child to be the primary caregiver.
3. Watch infants for signs that they are not becoming attached. For example, a child might become passive, not react to something that would typically upset a child, or seem not to thrive like other infants. Talk with family members, administrators, or other professionals if you observe these signs.
4. Recognize that fear of strangers and separation anxiety are normal stages of attachment in mobile infants. Help parents understand that fear of strangers and separation anxiety are normal.
5. Treat children as individuals by using their names rather than just talking to them as a group.
6. Maintain eye contact and interact with children in an engaging way during caregiving routines such as diapering and feeding.
7. Allow infants and toddlers to be with and watch others much of the day.
8. Set up interest areas with enough toys and materials for two to three children to play without having to argue over the materials.
9. Model "gentle touches" for toddlers as they interact with others.
10. Encourage family members to say goodbye to their infants and toddlers. This helps children understand what to expect when family members leave and trust that their loved ones will come back.
11. Realize that parents may be afraid that if their child becomes attached to other caregivers, their child might be less attached to them. Reassure parents and guardians that children can become attached to more than one person and will not become less attached to them.
12. Support each child's attachment to his/her family while the child is in your care. Greet both the infant/toddler and family members as they arrive and depart. Talk about family members with children during the day. Set up a communication system (report form, notebook) to let families know what the child's day has been like.

# Developing a Sense of Self With Others

1. Create opportunities for children to interact with others who have varying characteristics and abilities, identifying and pointing out areas in which they share a common interest.
2. Observe children in the classroom and facilitate their entry into social groups with their peers. Serve as broker between Dual Language Learners and children who speak English to facilitate their engagement in play with others. For example: Travis just joined the dramatic play center. Prompt him: "Travis, ask your classmates what they are playing." Then address classmates: "What part/job can Travis do?"
3. Alert children to the feelings and emotional needs of others (e.g., display and talk about pictures depicting various emotions; point out how children feel in various real-life situations).
4. Be aware of social interactions among children and create opportunities to support friendships. For example, create inviting areas within the room where small groups of children can play.
5. Help children see the effect of their behavior on others by encouraging them to see others' perspectives and share their ideas about solving problems and social conflicts (e.g., assist the process of conflict resolution).
6. Allow children to share ownership of the classroom by participating in discussions related to classroom decisions and helping to establish rules and routines.
7. Model asking for and understanding the viewpoints and opinions of others.
8. Promote an atmosphere of cooperation instead of competition (e.g., introduce activities that require two or three children to work together).
9. Provide opportunities for children to be responsible members of the classroom community, respecting shared rights and property and helping others (e.g., assign individual cubbies for belongings; rotate responsibility for tending classroom plants).
10. Maintain an ongoing flow of information between school and family, through home-school journals or cassette tapes, suggestion boxes, weekly newsletters, phone calls, or classroom visits.
11. Make the classroom the children's space, with displays of their creations, experiences, interests, and cultures.
12. Provide adaptive equipment and materials when a child needs support to be active and successful in program routines and activities. When children are able to participate, they feel a sense of belonging and security.

# Learning About Feelings

## Goal ESD-6: Children identify, manage, and express their feelings.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Express a range of emotions (happiness, sadness, fear, and anger) with their face, body, and voice. <i>ESD-6a</i></li> <li>Show when they feel overwhelmed or are in distress or pain (cry, yawn, look away, extend arms or legs, arch their body, fuss). <i>ESD-6b</i></li> <li>Soothe themselves (suck thumb or pacifier, shift attention, snuggle with soft toy). <i>ESD-6c</i></li> </ul>	<ul style="list-style-type: none"> <li>Express a range of emotions (happiness, sadness, fear and anger) with their face, body, and voice. <i>ESD-6d</i></li> <li>Use body language, facial expression, and sometimes words to communicate feelings (clap when happy, pout and hunch shoulders when sad, shout "Wheel!" when excited). <i>ESD-6e</i></li> <li>Separate from parent or main caregiver without being overcome by stress. <i>ESD-6f</i></li> <li>Find comfort and calm down in a familiar setting or with a familiar person. <i>ESD-6g</i></li> </ul>	<ul style="list-style-type: none"> <li>Express a range of emotions (happiness, sadness, fear, anger, disgust, tenderness, hostility, shame, guilt, satisfaction, and love) with their face, body, vocal sounds, and words. <i>ESD-6h</i></li> <li>Communicate to make needs known. <i>ESD-6i</i></li> <li>Manage emotions and control impulses with guidance and support (Say "I don't like that!" instead of hitting; wait by door instead of running ahead when excited to go out). <i>ESD-6j</i></li> <li>Display emotional outbursts less often. <i>ESD-6k</i></li> </ul>	<ul style="list-style-type: none"> <li>Express a range of emotions (happiness, sadness, fear, anger, disgust, tenderness, hostility, shame, guilt, satisfaction, and love) with their face, body, vocal sounds, and words. <i>ESD-6l</i></li> <li>Use a variety of words or signs to express and manage feelings more clearly. <i>ESD-6m</i></li> <li>Describe reasons for their feelings ("I'm sad because Grandma's leaving." "That makes me mad when you do that!"). <i>ESD-6n</i></li> </ul>	<ul style="list-style-type: none"> <li>Express a range of emotions (happiness, sadness, fear, anger, disgust, tenderness, hostility, shame, guilt, satisfaction, and love) with their face, body, vocal sounds, and words. <i>ESD-6o</i></li> <li>Independently manage and express feelings effectively most of the time. <i>ESD-6p</i></li> <li>Use a larger vocabulary for talking about different feelings ("I'm frustrated with that puzzle!" "I'm excited about our trip."). <i>ESD-6q</i></li> <li>Give reasons for their feelings that may include thoughts and beliefs as well as outside events ("I'm happy because I wanted to win and I did."). <i>ESD-6r</i></li> <li>Use problem-solving strategies when feeling angry or frustrated. <i>ESD-6s</i></li> </ul>

Teachers and caregivers should keep in mind that the way children express their emotions may be different for children from different cultural groups.

## Goal ESD-7: Children recognize and respond to the needs and feelings of others.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Become upset when another infant is crying. <i>ESD-7a</i></li> <li>• Respond differently to positive vs. negative emotional expressions of others. <i>ESD-7b</i></li> </ul>	<ul style="list-style-type: none"> <li>• Try to comfort another child or an adult who is upset (bring a comfort object, pat the person on the back). <i>ESD-7c</i></li> <li>• Look at familiar caregivers to see how the caregiver is feeling (do something wrong and look to see if the caregiver is angry, bump head and start crying after the caregiver expresses concern/tries to comfort). <i>ESD-7d</i></li> <li>• Match their tone and emotions to that of others during interactions. <i>ESD-7e</i></li> </ul>	<ul style="list-style-type: none"> <li>• Try to comfort another child or an adult who is upset (bring a comfort object, pat the person on the back). <i>ESD-7f</i></li> <li>• Communicate concern for others (share a toy with someone who doesn't have one, ask, "Are you OK?"). <i>ESD-7g</i></li> <li>• Offer help to meet the needs of others (pick up item someone dropped, help another child who is having trouble building a block tower). <i>ESD-7h</i></li> <li>• Recognize facial expressions or actions associated with different emotions. <i>ESD-7i</i></li> </ul>	<ul style="list-style-type: none"> <li>• Try to comfort another child or an adult who is upset (bring a comfort object, pat the person on the back). <i>ESD-7j</i></li> <li>• Communicate concern for others (share a toy with someone who doesn't have one, ask, "Are you OK?"). <i>ESD-7k</i></li> <li>• Offer help to meet the needs of others (pick up item someone dropped, help another child who is having trouble building a block tower). <i>ESD-7l</i></li> <li>• Show awareness that other people have different feelings ("I like raisins but he doesn't." "I'm scared on that ride but she isn't."). <i>ESD-7m</i></li> </ul>	<ul style="list-style-type: none"> <li>• Communicate understanding and empathy for others' feelings. <i>ESD-7n</i></li> <li>• Show awareness that their behavior can affect the feelings of others (say, "I didn't mean to scare you when I yelled."). <i>ESD-7o</i></li> <li>• Choose to act in ways that show respect for others' feelings and points of view most of the time with guidance and support (compliment each other during play, work out conflicts, show respect for opinions expressed by others). <i>ESD-7p</i></li> </ul>

Some children, particularly those with Asperger's or autism, may not recognize how other children are feeling and need help from teachers and caregivers in order to respond appropriately to the needs and feelings of others.

# Learning About Feelings

1. Be aware of infants' and toddlers' reactions and reassure them that you are there for them. Let them know you care for them even when they have strong negative feelings. Give them hugs, cheers, and hold them in your lap if they welcome these touches. (Remember, some children prefer to be comforted in other ways.)
2. Pay attention to infants' signals that they are overwhelmed. Give them some quiet time or extra time cuddling with you to help them recover. Take them out of situations where there are too many people, too much noise, or too much stimulation of any kind.
3. Talk about your own feelings with the children. Use words to describe your emotions.
4. Use "feeling" words to acknowledge and label emotions that you see the child is experiencing ("You're very mad!" "You look sad."). This helps the child to feel understood and learn to use words to describe feelings.
5. Understand that expression of feelings (both positive and negative) is important to healthy emotional development. Children need to express both types of feelings and have adults accept these feelings.
6. Provide adaptive equipment and materials when a child needs support to be active and successful in program routines and activities. When children are able to participate, they feel a sense of belonging and security.
7. Focus on each toddler's positive qualities and accomplishments. Avoid talking about children as good or bad, or messy or neat.
8. Accept the toddler's mistakes as a natural process of learning and exploring. Use supportive language such as "Oh, the milk spilled. Let's get a paper towel and clean it up," rather than "You're so clumsy. You made a mess."
9. Encourage independent choices so toddlers can feel a sense of control and success. For example, let them decide how to play and when they need to go to the toilet. Let them do things for themselves even if they do not do it exactly the way you would have.
10. Provide opportunities for toddlers to repeat successful activities over and over again until they are ready to move on to something more challenging. Have many different toys available to toddlers at the same time.
11. Use transition objects or comfort toys to help children change routines or settings.

# Learning About Feelings

1. Incorporate small and large group lessons focused on a discussion about feelings into regular classroom activities. Allow children to describe their feelings related to a personal event or classroom event, etc.
2. Make books about feelings available in the book area and for check-out. Include simple books with children's faces depicting feelings (can be teacher created or purchased).
3. Use a small flip chart with pictured expressions and labels so children can turn to the emotion that fits what they are feeling (or have an adult help them find it), especially nonverbal children or children who have language delays or difficulty with expressive language.
4. Include a "peace talk" area or corner where children can go for conflict resolution when they have a disagreement.
5. Read a familiar book and discuss each character's feelings or reactions.
6. Give children words to explain why they feel a certain way if they cannot express it themselves. ("I think you are angry because Joanie took your toy. Can you tell her?")
7. Guide children through brief exercises that can help reduce stress. For example, teach children how to take deep breaths when they are upset or to reach up and stretch their muscles to reduce tension.
8. Understand that expression of feelings (both positive and negative) is important to healthy emotional development. Children need to express both types of feelings and have adults accept these feelings.
9. Focus on each child's positive qualities and accomplishments. Avoid talking about children as good or bad, or messy or neat.
10. Talk with children about how other children might feel, particularly if they have done something to upset another child.

# Health and Physical Development (HPD)

Subdomains
Physical Health and Growth
Motor Development
Self-Care
Safety Awareness

The domain of **Health and Physical Development** focuses on physical growth and motor development, sound nutritional choices, self-care, and health/safety practices. This domain is the foundation for the future health and well-being of all children. Good physical health and motor development supports children's learning and plays a part in their ability to be successful in almost any type of activity.

During the time from birth to age five, children's bodies go through a period of rapid growth. Their body more than doubles in size and their brain develops more rapidly than during any other period in the lifespan. Helping children establish good health practices and eating habits is extremely important. Good nutrition promotes not only physical growth and health, but also cognitive development skills such as memory, problem solving, and decision-making. Children grow and develop best when they are provided a healthy and balanced diet, have sufficient rest, and are physically active so that they develop strength and stamina.

In addition to healthy eating habits, children must have a variety of physical experiences that promote physical fitness and allow

them to practice motor skills. Although developmental milestones don't occur at the exact same time for all children, their growth and motor development tends to follow a similar sequence as their skills build upon each other. They move from turning over to sitting up, from crawling to walking, and then from running to playing organized games. They also develop fine or small motor skills as they learn to use their hands for a variety of tasks. Early childhood programs can promote physical development by providing children with a safe, supervised environment where play is encouraged and children have ample opportunities to explore.

Health and physical development also includes children's growing independence in carrying out personal routines and their awareness of health and safety concerns. This awareness and independence grows when children begin to participate in group and individual routines such as changing diapers, putting away toys, or washing their hands. It is particularly important to pay attention to families' preferences and the routines that children are accustomed to at home. Self-care routines that are consistent with the family's culture will be more comfortable for children. Also, teachers and caregivers should be careful to help children develop a sense of independence

in ways that are comfortable for families. When children are very young, they need the constant presence and guidance of adults to help them carry out routines and ensure their safety. However, as they grow older, they show greater independence and begin to understand that some situations are dangerous. Caregivers and teachers can work with families to decide when and how to promote children's self-care routines and independence.

Finally, it is important to remember that each child develops at his/her own pace. However, teachers and caregivers may be the first to notice that a child's development is not consistent with typical expectations. If a parent or teacher is concerned that a child is not meeting many or all of the Goals and Developmental Indicators described in this document, additional evaluation may be needed. You should consult a pediatrician, neurologist, or developmental specialist to determine if further intervention is needed.

# Health and Physical Development (HPD)

## Physical Health and Growth

- Goal HPD-1: Children develop healthy eating habits.
- Goal HPD-2: Children engage in active physical play indoors and outdoors.
- Goal HPD-3: Children develop healthy sleeping habits.

## Motor Development

- Goal HPD-4: Children develop the large muscle control and abilities needed to move through and explore their environment.
- Goal HPD-5: Children develop small muscle control and hand-eye coordination to manipulate objects and work with tools.

## Self-Care

- Goal HPD-6: Children develop awareness of their needs and the ability to communicate their needs.
- Goal HPD-7: Children develop independence in caring for themselves and their environment.

## Safety Awareness

- Goal HPD-8: Children develop awareness of basic safety rules and begin to follow them.

# Physical Health and Growth

## Goal HPD-1: Children develop healthy eating habits.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Show interest in feeding routines. <i>HPD-1a</i></li> <li>• Help with feeding themselves (eat finger foods, hold bottle). <i>HPD-1b</i></li> <li>• Show hunger or fullness using actions, sounds, or words (cry or search for food, turn away when full). <i>HPD-1c</i></li> <li>• Show food preferences. <i>HPD-1d</i></li> <li>• Respond to different textures of food in their mouth (wait for the next bite, spit out food, turn head away). <i>HPD-1e</i></li> <li>• Eat different kinds of food such as liquids, pureed or soft foods, and finely chopped food. <i>HPD-1f</i></li> </ul>	<ul style="list-style-type: none"> <li>• Try new foods. <i>HPD-1g</i></li> <li>• Feed themselves with some assistance (may use hands, utensils or cups). <i>HPD-1h</i></li> <li>• Ask for or accept food when hungry. <i>HPD-1i</i></li> <li>• Eat enough to meet nutritional needs, even when amount or type of food varies over time (eat a lot at one meal and little at the next, show interest in many foods but no interest in others). <i>HPD-1j</i></li> <li>• Eat a variety of small pieces of age-appropriate table foods. <i>HPD-1k</i></li> </ul>	<ul style="list-style-type: none"> <li>• Try new foods. <i>HPD-1l</i></li> <li>• Feed themselves using utensils and hands. <i>HPD-1m</i></li> <li>• Accept or refuse food depending on their appetite and personal preference (make food choices at a meal, leave unwanted food on plate, ask for seconds of favorite food). <i>HPD-1n</i></li> <li>• Notice and talk about food preferences, textures, temperatures, and tastes (crunchy crackers, warm soup, sweet apples). <i>HPD-1o</i></li> </ul>	<ul style="list-style-type: none"> <li>• Try new foods. <i>HPD-1p</i></li> <li>• Feed themselves with utensils independently. <i>HPD-1q</i></li> <li>• Communicate that some foods are good for them (fresh fruits, vegetables, milk) and some are not healthy (potato chips, soda). <i>HPD-1r</i></li> </ul>	<ul style="list-style-type: none"> <li>• Try new foods. <i>HPD-1s</i></li> <li>• Feed themselves with utensils independently. <i>HPD-1t</i></li> <li>• Given a selection of familiar foods, identify which foods are nutritious and which are not. <i>HPD-1u</i></li> <li>• Talk about variety and amount of foods needed to be healthy (can identify what is missing from their meal). <i>HPD-1v</i></li> <li>• Name foods and beverages that help to build healthy bodies. <i>HPD-1w</i></li> </ul>

Children from all cultural backgrounds will be accustomed to eating different types of foods, some of which may be less nutritious. It's important to respect family preferences and to also introduce the idea that children should eat moderate amounts of a variety of foods, including healthy foods.

## Goal HPD-2: Children engage in active physical play indoors and outdoors.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Engage in physically active movements (spending time on their tummy, repeating actions, kicking, waving arms, rolling over). <i>HPD-2a</i></li> <li>Move their bodies to explore the indoor and outdoor environment. <i>HPD-2b</i></li> <li>Develop strength and stamina by continuing movements over short periods of time. <i>HPD-2c</i></li> </ul>	<ul style="list-style-type: none"> <li>Show they enjoy active play and seek to be physically active (choose to play often on climber, laugh and squeal while moving). <i>HPD-2d</i></li> <li>Anticipate and ask for outdoor play (point at door and say, "Out!", resist coming indoors). <i>HPD-2e</i></li> <li>Engage in regular and sustained movement (push toys around play yard, go up and down slide over and over). <i>HPD-2f</i></li> <li>Develop strength and stamina as they use large muscles and participate in physical activity for longer periods of time. <i>HPD-2g</i></li> </ul>	<ul style="list-style-type: none"> <li>Develop strength and stamina by spending moderate periods of time playing vigorously. <i>HPD-2h</i></li> <li>Show satisfaction with new active skills and strengths (ask others to watch them, say, "I'm big and strong!"). <i>HPD-2i</i></li> <li>With guidance and support, transition from active to quiet activities. <i>HPD-2j</i></li> </ul>	<ul style="list-style-type: none"> <li>Develop strength and stamina by spending moderate periods of time playing vigorously. <i>HPD-2k</i></li> <li>Choose a variety of structured and unstructured physical activities indoors and outdoors. <i>HPD-2l</i></li> <li>Participate in simple games and other structured motor activities that enhance physical fitness (songs with movement, throwing and catching). <i>HPD-2m</i></li> <li>Transition from active to quiet activities with limited guidance and support. <i>HPD-2n</i></li> </ul>	<ul style="list-style-type: none"> <li>Develop strength and stamina by spending extended periods of time playing vigorously. <i>HPD-2o</i></li> <li>Communicate ways exercise keeps us healthy and makes us feel good. <i>HPD-2p</i></li> <li>Participate in structured and unstructured motor activities that build strength, speed, flexibility, and coordination (red light, green light; chase; free play). <i>HPD-2q</i></li> <li>Transition independently from active to quiet activities most of the time. <i>HPD-2r</i></li> </ul>

Young children need both teacher-directed and free-play activities to promote participation in active physical play.

## Goal HPD-3: Children develop healthy sleeping habits.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Sleep for longer periods at a time (more at night, and less during the day). <i>HPD-3a</i></li> <li>Settle down and fall asleep after a routine that includes a familiar series of events. <i>HPD-3b</i></li> <li>Develop a personal sleep routine or pattern. <i>HPD-3c</i></li> </ul>	<ul style="list-style-type: none"> <li>Cooperate with sleep routines (choose a book, get preferred sleep toy). <i>HPD-3d</i></li> <li>Use simple sounds, gestures, or words to show they are tired (say, "Night, night."). <i>HPD-3e</i></li> </ul>	<ul style="list-style-type: none"> <li>Use language about sleep (say, "Time for bed," after clearing lunch things; give sign for sleep). <i>HPD-3f</i></li> <li>With guidance, participate in sleep routines (wash hands after lunch, get blanket, lie down on bed or mat). <i>HPD-3g</i></li> <li>Fall asleep on their own. <i>HPD-3h</i></li> </ul>	<ul style="list-style-type: none"> <li>Recognize and communicate signs of being tired. <i>HPD-3i</i></li> <li>With increasing independence, start and participate in sleep routines. <i>HPD-3j</i></li> </ul>	<ul style="list-style-type: none"> <li>Communicate ways sleep keeps us healthy and makes us feel good. <i>HPD-3k</i></li> <li>Independently start and participate in sleep routines most of the time. <i>HPD-3l</i></li> </ul>

In some cultures, children are not expected to sleep independently or fall asleep on their own. Teachers should be sensitive to a family's preferences about how their child goes to sleep.

# Physical Health and Growth

1. Promote and support breastfeeding for young children. Provide storage for breast milk, private areas for nursing mothers, and education about the benefits of breastfeeding for both mother and infant. Feed iron-fortified formula to infants who are not breastfeeding.
2. When an infant shows early signs of hunger (e.g., beginning to stir when sleeping), begin preparing food or milk so it is ready when the child is ready to eat. Allow enough time for them to finish bottles or food.
3. Ask families about food allergies and serve only foods children are not allergic to. Also, ask about any history of allergies in the family. Some children may need to avoid eggs, peanuts, nuts, and fish until they are two or three.
4. Allow children to leave food uneaten. Do not force them to eat more than they want. They may be full.
5. Allow enough time for children to explore foods with their fingers and to eat.
6. Eat healthy foods with children (fruits, vegetables, whole grains, dairy products, and protein). Talk about foods and how they help the body. ("Milk makes your bones and teeth strong.")
7. Offer a variety of safe and healthy foods that meet the nutritional needs of infants and toddlers. Ask families what they eat at home and offer these foods. Serve foods that respect the family's cultural, religious, and other preferences, and that represent the cultures of the children in the classroom.
8. Encourage young children to try new foods. Offer a new food up to 10 times if needed to let a child get used to a new taste and texture.
9. Offer types, sizes, and textures of food that each infant or toddler can eat safely and successfully. Work with families, dietitians, and health care professionals to offer the breast milk, formula, foods, and other forms of nutrition appropriate for children with special nutritional needs.
10. For young children who need help eating and drinking, offer support, proper positioning, special equipment, and many chances to practice eating and drinking. Offer cups and spoons and encourage children to feed themselves when they are ready.
11. Some infants and toddlers are highly sensitive to light, noise, and the way they are touched. Provide spaces that offer less stimulation so they can feel calm and comfortable. Work with families and specialists to offer appropriate physical activity for these children.
12. Ask families to share the sleep routine used at home and use it in the childcare environment if appropriate (rock the child to sleep, let them hold a special toy). Learn and say the words families use to tell someone they are tired. Use these words and teach children to use them to tell you they are tired.
13. Provide areas for children to rest to accommodate individual sleep needs. Infants and toddlers should have individual nap schedules.
14. Help children learn to calm themselves and fall asleep. For infants, consider playing soft music, lowering the lights, and quieting the environment. For older children who choose their own sleep positions, rubbing their back may help them relax and fall asleep.

# Physical Health and Growth

1. Model and discuss healthy eating habits and provide a variety of nutritious snacks and meals.
2. Develop a routine schedule for eating regular meals and snacks.
3. Work with families to develop cultural and religious awareness relating to foods and traditions of mealtime.
4. Provide activities that encourage children to explore a variety of foods, textures, and use of utensils.
5. Allow and encourage children to serve and clean up food. Provide materials for pretend play about shopping, cooking, serving, eating, and cleaning up.
6. Invite and encourage children to participate in physical activity and free play every day. Schedule several periods of active physical play each day, with each period lasting thirty to sixty minutes. Include time for child-directed play and adult-directed activities, and participate with children in the activities.
7. Share information about programs or activities in the community that encourage physical activity for families, including children with special needs: parks, greenways, playgrounds, swimming pools, lakes, and gyms.
8. Take children outside often and regularly in all seasons. Dress them appropriately for the weather (raincoats, sweaters, boots, mittens, coats, hats). Show children you enjoy being outdoors and encourage them to explore the outdoor environment.
9. Read books about healthy practices. Discuss the concepts of rest, exercise, and good eating related to good health.
10. Carry out sleep routines that meet the child's needs and take into account the beliefs, customs, and needs of families.
11. Encourage and support children's need for rest and relaxation by scheduling both active and quiet times during the day.

# Motor Development

**Goal HPD-4: Children develop the large muscle control and abilities needed to move through and explore their environment.**

## Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Gain control of arm and leg movements. <i>HPD-4a</i></li> <li>Maintain upright posture when sitting and standing. <i>HPD-4b</i></li> <li>Move in and out of various positions by rolling, pushing up, and pulling to stand. <i>HPD-4c</i></li> <li>Move from place to place as their abilities allow (squirm, roll, scoot, crawl, cruise, or walk). <i>HPD-4d</i></li> </ul>	<ul style="list-style-type: none"> <li>Develop strength, balance, and coordination by repeating movements (pull up and sit down; bend and straighten, squat to pick something up from the floor). <i>HPD-4e</i></li> <li>Move their arms and legs together to climb, push, and pull (push a stroller, use riding toys, crawl up steps). <i>HPD-4f</i></li> <li>Move through the world with more independence (crawl, cruise, walk, run, use therapeutic walker). <i>HPD-4g</i></li> </ul>	<ul style="list-style-type: none"> <li>Move their arms and legs to complete a task (kick, jump, step, pedal, push away). <i>HPD-4h</i></li> <li>Move through the world with a variety of movements and with increasing independence (run, jump, pedal). <i>HPD-4i</i></li> <li>Use familiar objects that encourage large motor movements (riding toys, crawl tubes, large ball in basket, slide). <i>HPD-4j</i></li> <li>Perform actions smoothly with balance, strength, and coordination (dance, bend over to pick up a toy, reach up high on a shelf, walk up and down steps). <i>HPD-4k</i></li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate strength and balance by managing uneven surfaces such as hills, ramps, and steps. <i>HPD-4l</i></li> <li>Refine movements and show generally good coordination (e.g., throwing and catching). <i>HPD-4m</i></li> <li>Use a variety of toys and equipment that enhance gross motor development (balls, slides, pedaling toys, assistive technology). <i>HPD-4n</i></li> <li>Move their bodies in space with good coordination (running, hopping in place, galloping). <i>HPD-4o</i></li> </ul>	<ul style="list-style-type: none"> <li>Coordinate movement of upper and lower body. <i>HPD-4p</i></li> <li>Perform complex movements smoothly (skipping, balancing on beams, hopping from one place to another). <i>HPD-4q</i></li> <li>Move quickly through the environment and be able to stop (run fast, pedal fast). <i>HPD-4r</i></li> <li>Show awareness of own body in relation to other people and objects while moving through space. <i>HPD-4s</i></li> </ul>

## Goal HPD-5: Children develop small muscle control and hand-eye coordination to manipulate objects and work with tools.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Use both hands to swipe at, reach for, grasp, hold, shake, and release objects. <i>HPD-5a</i></li> <li>Transfer objects from one hand to the other. <i>HPD-5b</i></li> <li>Use a pincer grasp to pick up an object with finger and thumb. <i>HPD-5c</i></li> </ul>	<ul style="list-style-type: none"> <li>Use hands to manipulate objects (stack two or three large blocks, pick up or roll a ball). <i>HPD-5d</i></li> <li>Use hands and eyes together (put together and take apart toys, feed themselves finger foods, fill containers). <i>HPD-5e</i></li> <li>Use simple tools (spoon for feeding, hammer with pegs, crayon for scribbling). <i>HPD-5f</i></li> </ul>	<ul style="list-style-type: none"> <li>Use more complex, refined hand movements (stack a few small blocks, try to draw, turn pages one at a time). <i>HPD-5g</i></li> <li>Use hands and eyes together with a moderate degree of control (complete puzzles, thread beads with large holes, use shape sorters). <i>HPD-5h</i></li> <li>Use tools that require finger and hand control (large paintbrush, measuring cups, switches, shovel). <i>HPD-5i</i></li> </ul>	<ul style="list-style-type: none"> <li>Draw simple shapes and figures (square for block, circles). <i>HPD-5j</i></li> <li>Engage in activities that require hand-eye coordination (build with manipulatives, mold Play-Doh®, work puzzles with smaller pieces). <i>HPD-5k</i></li> <li>Use tools that require strength, control, and dexterity of small muscles (forks, crayons, markers, safety scissors, adapted tools). <i>HPD-5l</i></li> </ul>	<ul style="list-style-type: none"> <li>Draw and write smaller figures with more detail (faces with features, letters, or letter-like forms). <i>HPD-5m</i></li> <li>Engage in complex hand-eye coordination activities with a moderate degree of precision and control (fasten clothing, cut shapes, put together small pieces). <i>HPD-5n</i></li> <li>Use tools that require strength and dexterity of small muscles with a moderate degree of control (spray bottle, hole puncher). <i>HPD-5o</i></li> </ul>

## Strategies for Infants and Toddlers

# Motor Development

1. Play with infants and toddlers both indoors and outdoors. Make sure the environment is safe. Include play on a variety of surfaces and provide open spaces for free movement.
2. Play with infants on their tummies frequently throughout the day. Place interesting toys in front of them and use a rolled towel to support a baby's chest and arms if needed. For babies who do not like being on their stomachs, try a few minutes of tummy time several times a day rather than for one long period.
3. Give young children brightly colored and interesting toys to reach for or move toward (balls, mobiles, soft toys). Encourage them to bring their hands together as they play with objects.
4. Put small, safe objects on a tray or protected spot on the floor for children to grab and handle. For example, offer rattles and teething toys to infants; blocks, crayons, and snap-together toys to older toddlers. For children with impaired vision, use toys with switches and varied textures. Increase contrasts to help them see what is there (bright toy on black background; pictures outlined with heavy line).
5. Play games from different cultures that include hand motions with words, such as "Pat-a-cake," *"Todos Los Pescados,"* and "Itsy Bitsy Spider."
6. Offer materials and activities to encourage large sweeping motions and the ability to hold objects. For example, children might draw or paint with crayons, finger paints, or objects like rubber stamps and small-wheeled vehicles. Use wide brushes or markers; adapt handles for children with limited hand control.

7. Provide opportunities for children to practice small motor skills during daily activities and routines (zipping zippers when putting on clothing, passing out smaller objects to friends, etc.).
8. Use diapering time to do baby exercises and to play (bicycling legs, arm lifts, kicking, reaching).
9. Provide pillows, small mounds, balance beams, stepping-stones, and other low barriers for children to climb on and over. This develops balance, builds strength, and improves coordination.
10. Run, jump, skip, hop, and throw balls with children, both indoors and outside. Encourage them to move their bodies indoors and outdoors with movement games, music, and dancing from different cultures (e.g., "I'm a Little Tea Pot," "Little Sally Walker," "De Colores," "All Fish Swimming in the Water").
11. Create an environment that includes materials and equipment that can be used by children with varying physical abilities. For children with disabilities, provide supports or special equipment that allows them to participate in physical activities and play (therapeutic walker, scooter board, supportive seating for swings or riding toys, bars for pulling up).
12. Create mazes and obstacle courses that are age appropriate. For example, invite children to move through tunnels, under chairs, around tree trunks, and over low hills.
13. Provide push and pull toys, riding toys (with and without pedals), balls, tools, slides, and other materials that give children chances to exercise large muscles and practice skills.
14. Create activities to encourage children with different abilities to play and learn together. For example, play a game of catch with a foam ball with children sitting down on the floor or ground. Include children who cannot walk with other children in the group.

# Motor Development

1. Plan activities that use a variety of materials to support fine motor skill development, with adaptations as needed, respecting culture and differing ability levels (paper, pencils, crayons, safety scissors, Play-Doh®, manipulatives, blocks, etc.).
2. Provide daily opportunities and a variety of activities for children to use hand-held tools and objects.
3. Model the use of drawing and writing tools in daily activities.
4. Provide opportunities for children to pour their own drinks and to serve foods, such as spooning out applesauce.
5. Provide a variety of materials, such as beads and snap cubes, for children to put together and pull apart.
6. Offer children toys and materials to fill, stack, dump, and pour, such as small blocks, buckets, plastic cups, and water. Provide options for children with different abilities. For example, include Play-Doh®, puzzles with and without knobs, empty boxes, and containers with lids. Be sure to stock manipulative centers with containers for objects to be put into.
7. Provide child-size tables and chairs so children can use them independently.
8. Provide many opportunities for and actively participate in children's outdoor play.
9. Change materials routinely to encourage discovery, engagement, and participation.
10. Create an environment that includes materials and equipment that can be used by children with varying physical abilities.
11. Encourage children to take part in active play every day, such as climbing, running, hopping, rhythmic movement, dance, and movement to music and games.
12. Supervise and participate in daily outdoor play. Provide adequate space and age-appropriate equipment and materials, with adaptations as needed.
13. Plan daily physical activities that are vigorous as well as developmentally and individually appropriate.
14. Create an environment that includes materials and equipment that can be used by children with varying physical abilities. For children with disabilities, provide supports or special equipment that allows them to participate in physical activities and play (therapeutic walker, scooter board, supportive seating for swings or riding toys, bars for pulling up).
15. Create activities to encourage children with different abilities to play and learn together. For example, play a game of catch with a foam ball with children sitting down on the floor or ground. Include children who cannot walk with other children in the group.

# Self-Care

## Goal HPD-6: Children develop awareness of their needs and the ability to communicate their needs.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Use different sounds to let caregivers know they need attention. <i>HPD-6a</i></li> <li>Begin to soothe themselves (suck thumb, find pacifier, reach for a security object). <i>HPD-6b</i></li> </ul>	<ul style="list-style-type: none"> <li>Use gestures, words, or sign language to communicate what they need. <i>HPD-6c</i></li> <li>Use objects and follow routines that are comforting (get their blanket and lie down where they usually sleep, pick out favorite book to be read before lunch). <i>HPD-6d</i></li> </ul>	<ul style="list-style-type: none"> <li>Use words or sign language to ask for the things they need (food when hungry, drink when thirsty, go outdoors when they need to be physically active). <i>HPD-6e</i></li> <li>Soothe themselves when needed (find a quiet area for alone time, look at book before nap). <i>HPD-6f</i></li> </ul>	<ul style="list-style-type: none"> <li>Use words or sign language to ask for the things they need (food when hungry, drink when thirsty, go outdoors when they need to be physically active). <i>HPD-6g</i></li> <li>Use different strategies to calm themselves when needed (self-talk, deep breathing, cozy corner). <i>HPD-6h</i></li> </ul>	<ul style="list-style-type: none"> <li>Use language to ask adults or peers specifically for the kind of help needed in a particular situation. <i>HPD-6i</i></li> <li>Consistently use strategies to calm themselves when needed. <i>HPD-6j</i></li> </ul>

Children with disabilities may communicate their needs in different ways. Teachers and caregivers should be sensitive to children's verbal and non-verbal signals. For children with language delays, watch carefully to see how the child may communicate through her/his facial expressions, gestures, and/or assistive technology device.

## Goal HPD-7: Children develop independence in caring for themselves and their environment.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Tolerate care routines (mouth care, hand-washing, diapering, dressing, and bathing). <i>HPD-7a</i></li> <li>• Show interest and assist in routines (open mouth for milk or spoon, raise arms for dressing). <i>HPD-7b</i></li> </ul>	<ul style="list-style-type: none"> <li>• Cooperate and help with care routines and cleanup (mouth-care, hand-washing, diapering, dressing, bathing). <i>HPD-7c</i></li> <li>• Drink from a cup and feed themselves with their fingers or a spoon. <i>HPD-7d</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use adaptive equipment, ask for help with positioning and movement, and/or participate in medical care routines as needed. <i>HPD-7e</i></li> <li>• Initiate self-care routines and complete with guidance (put on some clothes, undress, throw away paper towel, begin to show an interest in toileting). <i>HPD-7f</i></li> <li>• Feed themselves with a spoon. <i>HPD-7g</i></li> <li>• Help with meal and snack routines. <i>HPD-7h</i></li> <li>• Take care of objects (put toys away, handle materials carefully, water plants or garden). <i>HPD-7i</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use adaptive equipment, ask for help with positioning and movement, and/or participate in medical care routines as needed. <i>HPD-7j</i></li> <li>• Dress and undress themselves with occasional assistance. <i>HPD-7k</i></li> <li>• Follow basic hygiene practices with reminders (brush teeth, wash hands, use toilet, cough into elbow). <i>HPD-7l</i></li> <li>• Serve food for themselves. <i>HPD-7m</i></li> <li>• Help with routine care of the indoor and outdoor learning environment (recycle, care for garden). <i>HPD-7n</i></li> <li>• Name people who help children stay healthy. <i>HPD-7o</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use adaptive equipment, ask for help with positioning and movement, and/or participate in medical care routines as needed. <i>HPD-7p</i></li> <li>• Dress and undress themselves independently. <i>HPD-7q</i></li> <li>• Gain independence in hygiene practices (throw tissues away and wash hands, flush toilet). <i>HPD-7r</i></li> <li>• Eat with a fork. <i>HPD-7s</i></li> <li>• Perform tasks to maintain the indoor and outdoor learning environment independently. <i>HPD-7t</i></li> <li>• Describe the value of good health practices (wash hands to get rid of germs, drink milk to build strong bones). <i>HPD-7u</i></li> </ul>

Some families may not value independence in self-care routines—in their culture, the adults help children with self-care routines for a longer period of time.

### Self-Care

1. Respond quickly and consistently when children tell you they need something. Learn to read their cues, cries, and gestures. Ask family members how and when children may communicate certain needs.
2. Establish regular routines for diapering, toileting, hand washing, eating, sleeping, and dressing children. Do things the same way every time as much as possible.
3. Use routine care as opportunities for one-on-one interactions: talk about the routine and feelings; sing a song; move legs and arms of young infants.
4. Provide children many opportunities to use the toilet when they show they are ready. Support all attempts to use the toilet. Coordinate the timing and process of toilet learning with the family.
5. Establish routines of hand washing at appropriate times (e.g., before and after meals, after outdoor play, etc.) and provide guidance for children to learn how to wash their hands appropriately. Provide hand-washing stations that children can reach safely on their own.
6. Encourage children to practice cleansing their mouths and brushing their teeth. Model tooth brushing for older toddlers. Provide stations for tooth brushing that children can reach safely on their own.
7. Encourage children to take an active part in dressing themselves. Suggest a step the child can complete. ("Put your foot in your pant leg." "Pull up your pants." "Pull your arm out of your sleeve.")
8. Allow plenty of time for children to try and to participate in all self-care tasks.
9. Ask families and healthcare professionals if a child with disabilities or special healthcare needs has any special self-care needs. Help children understand and participate in these special self-care tasks. Use picture cards to guide them through the steps of self-care routines like hand washing.
10. Learn about the abilities and customs of children and their families. Set up routines so children can do them successfully. Make routines as similar to home as possible.

## Strategies for Preschoolers

### Self-Care

1. Teach and model hygienic practices (e.g., washing hands, sneezing or coughing into your elbow or sleeve, and dental care).
2. Use interesting and entertaining ways to practice personal care and self-help skills (e.g., add baby doll outfits and clothing with fasteners to the dramatic play center, provide props that encourage children to practice hygienic practices such as washing their hands).
3. Provide instruction and facilitate ample opportunities for children to practice self-care skills as independently as they are able (e.g., verbally or nonverbally asking for help, feeding themselves, dressing, washing hands, toileting, and locating personal items).
4. Maintain environments that support children's ability to carry out self-care and hygiene routines independently (child-size sink, toilet, coat rack, toothbrushes, etc.).
5. Encourage children to show independence in self-care practices. Provide time, support, and equipment as needed.
6. Establish routines of hand washing at appropriate times (e.g., before and after meals, after outdoor play, etc.) and provide guidance for children to learn how to wash their hands appropriately. Provide hand-washing stations that children can reach safely on their own.
7. Respond consistently to children's expressions of need.
8. Offer children play food and kitchen utensils from many cultures, especially the cultures of families in your group. Offer toys and props to practice self-care behaviors (healthy play food, dress-up clothes that are easy to put on, tubs to wash baby dolls).
9. Read books about visits with the doctor and the dentist. Offer play props so children can pretend to visit them.
10. Teach children about the benefits of good personal health practices. Make sure to take into account individual family beliefs and customs.

# Safety Awareness

**Goal HPD-8: Children develop awareness of basic safety rules and begin to follow them.**

## Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Show trust in familiar caregivers (calm down with adult help, make eye contact with caregivers). <i>HPD-8a</i></li> <li>• Notice and imitate adults' reactions to new people and situations. <i>HPD-8b</i></li> </ul>	<ul style="list-style-type: none"> <li>• Watch for adult reactions to unfamiliar things or situations that might be dangerous. <i>HPD-8c</i></li> <li>• Show some caution about unfamiliar and/or unsafe situations. <i>HPD-8d</i></li> <li>• Respond to simple warnings that prevent harm ("Stop!" "Hot!" "Wait!"). <i>HPD-8e</i></li> </ul>	<ul style="list-style-type: none"> <li>• Remember cause and effect experiences and apply their experiences to future situations (avoid touching cold railing, walk slowly down steep hill where fall happened). <i>HPD-8f</i></li> <li>• Increase self-control over their impulses (remind self not to touch something; wait for adult vs. running ahead). <i>HPD-8g</i></li> <li>• With guidance, recognize and avoid situations that might cause harm. <i>HPD-8h</i></li> </ul>	<ul style="list-style-type: none"> <li>• Know what their bodies can do, and play within their abilities to avoid injury to self or others. <i>HPD-8i</i></li> <li>• Usually recognize and avoid objects and situations that might cause harm. <i>HPD-8j</i></li> <li>• Usually follow basic safety rules. <i>HPD-8k</i></li> <li>• Call a trusted adult when someone gets injured or is in an unsafe situation. <i>HPD-8l</i></li> </ul>	<ul style="list-style-type: none"> <li>• Avoid potentially dangerous behaviors. <i>HPD-8m</i></li> <li>• Consistently recognize and avoid people, objects, substances, activities, and environments that might cause harm. <i>HPD-8n</i></li> <li>• Independently follow basic safety rules. <i>HPD-8o</i></li> <li>• Identify people who can help them in the community (police, firefighter, nurse). <i>HPD-8p</i></li> </ul>

## Strategies for Infants and Toddlers

### Safety Awareness

1. Provide a safe environment indoors and outdoors so infants and toddlers can explore without hurting themselves or others. Help families learn about safe environments for infants and toddlers.
2. Stay near infants and toddlers at all times and watch to keep them safe.
3. Hold, cuddle, make eye contact, and talk with young children to build trust.
4. Model safe practices for infants and toddlers. (Don't stand on chairs or sit on shelves.) Explain why and how unsafe actions can hurt them and others.
5. Do not try to make infants or toddlers do things they are afraid to do. Help them learn to trust their feelings about what is safe and what is not safe.
6. Repeat safety messages every time they are needed. Understand that you may have to repeat them many times. ("Please put your feet on the ground. Chairs are for sitting.")
7. Give specific praise to toddlers for remembering safety messages and safe behaviors. ("Thank you for waiting for me." "That's good. You're sitting in your chair.")
8. Use play with older toddlers to reinforce safety messages and practice responding to dangerous situations. ("Let's pretend the fire alarm went off. What should we do?")
9. Continue to supervise older toddlers closely. They are beginning to develop self-control, but it is easy for them to get excited and forget what is dangerous.

# Safety Awareness

1. Provide a safe, healthy, supportive environment with appropriate supervision.
2. Teach safety rules and model safe practices (e.g., bus safety, playground safety, staying with the group, safe use of classroom materials, and knowing personal identification information).
3. Teach and model appropriate responses to potentially dangerous situations, including fire, violent weather, and strangers or other individuals who may cause harm.
4. Repeat safety messages every time they are needed. Understand that you may have to repeat them many times. ("Please put your feet on the ground. Chairs are for sitting.")
5. Use play to reinforce safety messages and practice responding to dangerous situations. ("Let's pretend the fire alarm went off. What should we do?")
6. Talk about consequences of unsafe behavior such as injury to self or damage to property.
7. Help preschoolers identify people they can go to when they feel afraid or where to go to feel safe when they need help (family members, caregivers, fire fighters, and other community helpers).

# Language Development and Communication (LDC)

Subdomains
Learning to Communicate
Foundations for Reading
Foundations for Writing

From birth, children are learning language and developing the ability to communicate. The **Language Development and Communication** domain describes many important aspects of children's language and early literacy development.

Language development begins with children's ability to understand what others are communicating to them. Infants and toddlers often can understand much more than they can say. They learn the meaning of words and other forms of communication first, and gradually learn to express themselves, starting with the ability to express their needs through crying, gesturing, and facial expressions, and later using words to express themselves. By the time they are preschoolers, most children have developed a large vocabulary and are learning the rules of language, such as grammar.

Children also learn many important early literacy skills as they grow and develop. The youngest children build the foundation for reading and writing as they explore books, listen to songs and nursery rhymes, hear stories, and begin to draw and scribble. Preschoolers learn to follow along as someone reads to them, remember familiar stories and talk about them, learn the names of the

letters of the alphabet, and begin to be more intentional about what they draw and scribble.

Adults who build nurturing relationships by paying close attention to what children are trying to communicate and responding consistently to children's communication help children become good communicators. This is especially important for infants and toddlers as they learn first how to communicate nonverbally, and then with words. Teachers and caregivers also promote communication skills and early literacy skills as they talk with, read to, and sing with children of all ages. Children learn that reading and writing are important as they see adults using these skills in everyday life and, for preschoolers, as they begin to point out letters, help children follow print, and play games to introduce early literacy concepts such as the sounds included in words. Teachers and caregivers support children's early literacy development through learning experiences that introduce early literacy concepts such as the names of letters naturally as a part of daily routines and activities, as opposed to teaching one letter per week or focusing on early literacy skills outside of daily activities that children find meaningful.

Many families speak languages other than English at home. Children need to continue

to learn and speak their family's language because learning their home language lays the foundation for learning English, plus they will learn other concepts more easily. Children whose families speak a language other than English will probably demonstrate progress on the Goals and Developmental Indicators included in *Foundations* in their home language, so it's really important to encourage children and their families to continue to use their own language while they are learning English.

Teachers and caregivers should also keep in mind that children with disabilities may need extra support when they are communicating with others. They may need listening devices to help them hear so that they can learn the sounds and words used in language. They may need therapy or assistive devices to help them communicate clearly. Teachers and caregivers should communicate with and observe young children carefully to see if they are picking up communication skills early on, and seek additional assistance if a child seems to have a delay in this area.

# Language Development and Communication (LDC)

## **Learning to Communicate**

- Goal LDC-1: Children understand communications from others.
- Goal LDC-2: Children participate in conversations with peers and adults in one-on-one, small, and larger group interactions.
- Goal LDC-3: Children ask and answer questions in order to seek help, get information, or clarify something that is not understood.
- Goal LDC-4: Children speak audibly and express thoughts, feelings, and ideas clearly.
- Goal LDC-5: Children describe familiar people, places, things, and events.
- Goal LDC-6: Children use most grammatical constructions of their home language well.
- Goal LDC-7: Children respond to and use a growing vocabulary.

## **Foundations for Reading**

- Goal LDC-8: Children develop interest in books and motivation to read.
- Goal LDC-9: Children comprehend and use information presented in books and other print media.
- Goal LDC-10: Children develop book knowledge and print awareness.
- Goal LDC-11: Children develop phonological awareness.
- Goal LDC-12: Children develop knowledge of the alphabet and the alphabetic principle.

## **Foundations for Writing**

- Goal LDC-13: Children use writing and other symbols to record information and communicate for a variety of purposes.
- Goal LDC-14: Children use knowledge of letters in their attempts to write.
- Goal LDC-15: Children use writing skills and writing conventions.

# Learning to Communicate

## Goal LDC-1: Children understand communications from others.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Engage in individual and reciprocal sound exploration and play (make “raspberries” or other sounds with someone). <i>LDC-1a</i></li> <li>Show interest in voices, and focus on speech directed at them. <i>LDC-1b</i></li> <li>Respond to different tones in speech directed at them. <i>LDC-1c</i></li> <li>Respond to simple requests (“Come here.” or “Do you want more?”). <i>LDC-1d</i></li> </ul>	<ul style="list-style-type: none"> <li>Respond to others by using words or signs. <i>LDC-1e</i></li> <li>Respond to gestures, facial expressions, tone of voice, and some words that show emotions. <i>LDC-1f</i></li> <li>Follow simple directions and/or visual cues (“Put your pillow on the mat.” “Please sit by me.”). <i>LDC-1g</i></li> </ul>	<ul style="list-style-type: none"> <li>Respond when others talk to them, using a larger variety of words or signs. <i>LDC-1h</i></li> <li>Respond to gestures, facial expressions, tone of voice, and some words that show emotions. <i>LDC-1i</i></li> <li>Follow two-step directions with visual cues if needed (“Pick up the paper and put it in the trash.” “Get your cup and put it on the table.”). <i>LDC-1j</i></li> </ul>	<ul style="list-style-type: none"> <li>Show understanding of increasingly complex sentences. <i>LDC-1k</i></li> <li>With prompting and support, respond to requests for information or action. <i>LDC-1l</i></li> <li>Follow simple multistep directions with visual cues if needed. <i>LDC-1m</i></li> </ul>	<ul style="list-style-type: none"> <li>Show understanding of increasingly complex sentences. <i>LDC-1n</i></li> <li>Respond to requests for information or action. <i>LDC-1o</i></li> <li>Follow more detailed multistep directions. <i>LDC-1p</i></li> </ul>

Receptive communication, or understanding what others are communicating, is one of the first communication skills to emerge. Children begin to understand what others are communicating to them much earlier than they are able to express themselves to others.

## Goal LDC-2: Children participate in conversations with peers and adults in one-on-one, small, and larger group interactions.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Respond differently to facial expressions and tones of voice. <i>LDC-2a</i></li> <li>Pay brief attention to the same object the caregiver is looking at. <i>LDC-2b</i></li> <li>Engage in turn taking during social and vocal play with adults and other children (babbling, imitating facial expressions, repeating sounds from languages they hear). <i>LDC-2c</i></li> </ul>	<ul style="list-style-type: none"> <li>Establish joint attention by looking at an object, at their caregiver, and back at the object. <i>LDC-2d</i></li> <li>Respond to and initiate dialogue with another person. <i>LDC-2e</i></li> <li>Use movement or behavior to initiate interaction with another person. <i>LDC-2f</i></li> </ul>	<ul style="list-style-type: none"> <li>Engage in short dialogues of a few turns. <i>LDC-2g</i></li> <li>Ask questions or use verbal or nonverbal cues to initiate communication with another. <i>LDC-2h</i></li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate an understanding that people communicate in many ways (gestures, facial expressions, multiple spoken languages, sign language, augmentative communication). <i>LDC-2i</i></li> <li>Initiate and carry on conversations, and ask questions about things that interest them. <i>LDC-2j</i></li> <li>With prompting and support, make comments and ask questions related to the topic of discussion. <i>LDC-2k</i></li> </ul>	<ul style="list-style-type: none"> <li>Express an understanding that people communicate in many ways (gestures, facial expressions, multiple spoken languages, sign language, and augmentative communication). <i>LDC-2l</i></li> <li>Initiate and carry on conversations that involve multiple back and forth communications or turns between the persons involved in the conversation. <i>LDC-2m</i></li> <li>Initiate and participate in conversations related to interests of their own or the persons they are communicating with. <i>LDC-2n</i></li> <li>Participate in a group discussion, making comments and asking questions related to the topic. <i>LDC-2o</i></li> <li>Appreciate and use humor. <i>LDC-2p</i></li> </ul>

Dual Language Learners who are learning a home language that is not English most often have stronger communication skills in their home language. It is important that they continue to learn communication skills in their home language even when they begin to learn to speak English.

**Goal LDC-3: Children ask and answer questions in order to seek help, get information, or clarify something that is not understood.**

**Developmental Indicators**

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<ul style="list-style-type: none"> <li>Respond to simple statements and questions about pictures, play, people, and things that are happening. <i>LDC-3a</i></li> </ul>	<ul style="list-style-type: none"> <li>Answer simple questions (“What is she doing?” “What happened to the bear in the story?”). <i>LDC-3b</i></li> <li>Use simple sentences or questions to ask for things (e.g., people, actions, objects, pets) or gain information. <i>LDC-3c</i></li> </ul>	<ul style="list-style-type: none"> <li>Answer longer questions using more detail. <i>LDC-3d</i></li> <li>Use sentences or questions to ask for things (people, actions, objects, pets) or gain information. <i>LDC-3e</i></li> </ul>	<ul style="list-style-type: none"> <li>Answer more complex questions with more explanation (“I didn’t like camping out because it rained.” “Emily is my friend because she’s nice to me.”). <i>LDC-3f</i></li> <li>Ask specific questions to learn more about their world, understand tasks, and solve problems. <i>LDC-3g</i></li> </ul>

## Goal LDC-4: Children speak audibly and express thoughts, feelings, and ideas clearly.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Repeat actions that mean something specific (lift arms to be picked up, point at desired toys). <i>LDC-4a</i></li> <li>Make different sounds for different purposes (whimper when wet, cry loudly when hungry). <i>LDC-4b</i></li> <li>“Jabber” and pretend to talk using many sounds or signs from the languages used around them. <i>LDC-4c</i></li> </ul>	<ul style="list-style-type: none"> <li>Communicate through facial expressions, sounds, and body movements. <i>LDC-4d</i></li> <li>Expect others to understand them and show frustration, often through their behavior, if not understood. <i>LDC-4e</i></li> </ul>	<ul style="list-style-type: none"> <li>Communicate messages with expression, tone, and inflection. <i>LDC-4f</i></li> <li>Use speech that is understood most of the time by familiar listeners. <i>LDC-4g</i></li> </ul>	<ul style="list-style-type: none"> <li>Communicate messages with expression, tone, and inflection appropriate to the situation. <i>LDC-4h</i></li> <li>Speak clearly enough to be understood by familiar adults and children. <i>LDC-4i</i></li> </ul>	<ul style="list-style-type: none"> <li>Use language and nonverbal cues to communicate thoughts, beliefs, feelings, and intentions. <i>LDC-4j</i></li> <li>Adapt their communication to meet social expectations (speak quietly in library, speak politely to older relative). <i>LDC-4k</i></li> <li>Speak clearly enough to be understood by most people. <i>LDC-4l</i></li> </ul>

Children who are generally more quiet than others and children who are learning English as a second language may speak less often, so it's important for teachers and caregivers to pay close attention when quiet children do talk. Be sure to give them many opportunities to express themselves in different ways, and listen carefully to see if you can understand the child easily.

Children with disabilities may not have clear speech. If a child has a diagnosed language delay or disability, look for other ways in which he or she can communicate to see if his/her communication skills are progressing.

## Goal LDC-5: Children describe familiar people, places, things, and events.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<ul style="list-style-type: none"> <li>Act out familiar scenes and events, and imitate familiar people. <i>LDC-5a</i></li> </ul>	<ul style="list-style-type: none"> <li>Talk to themselves and others about what they are “working on,” what they are doing, routines, and events of the day. <i>LDC-5b</i></li> <li>Use dramatic play to act out familiar scenes and events, and imitate familiar people. <i>LDC-5c</i></li> </ul>	<ul style="list-style-type: none"> <li>Talk to themselves and others about what they are “working on,” what they are doing, routines, and events of the day. <i>LDC-5d</i></li> <li>Describe experiences and create or retell short narratives. <i>LDC-5e</i></li> </ul>	<ul style="list-style-type: none"> <li>Describe experiences and create and/or retell longer narratives. <i>LDC-5f</i></li> </ul>

## Goal LDC-6: Children use most grammatical constructions of their home language well.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Make different sounds for different purposes (whimper when wet, cry loudly when hungry). <i>LDC-6a</i></li> <li>• “Jabber” and pretend to talk using many sounds or signs from the languages used around them to communicate. <i>LDC-6b</i></li> </ul>	<ul style="list-style-type: none"> <li>• “Jabber” and put together vocalizations in a way that sounds similar to the rhythm and flow of their home language. <i>LDC-6c</i></li> <li>• Use a few words to communicate (make requests and ask questions). <i>LDC-6d</i></li> </ul>	<ul style="list-style-type: none"> <li>• Communicate in short sentences that follow the word order of their home language. <i>LDC-6e</i></li> <li>• Combine two and three words. <i>LDC-6f</i></li> </ul>	<ul style="list-style-type: none"> <li>• Communicate in longer sentences and use more conventional grammar in their home language (plurals, tenses, prepositions). <i>LDC-6g</i></li> <li>• Make grammatical errors that follow language rules (say, “mouses” instead of “mice”). <i>LDC-6h</i></li> </ul>	<ul style="list-style-type: none"> <li>• Speak in full sentences that are grammatically correct most of the time. <i>LDC-6i</i></li> </ul>

Children learn to speak with proper grammar slowly, over time. For instance, it takes longer for children to understand how to use personal pronouns like “I” or “you.” They often make mistakes that may be puzzling or funny to adults, but this is part of the process of learning the rules of language. Dual Language Learners learn grammar rules first in their home language. It takes longer for them to get the hang of the rules of the second language they are learning, and they may use the grammatical constructions of their home language even when they use English words.

## Goal LDC-7: Children respond to and use a growing vocabulary.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Make specific sounds, facial expressions, and/or gestures for certain people and objects. <i>LDC-7a</i></li> <li>• Imitate sounds, words, and gestures. <i>LDC-7b</i></li> <li>• Recognize spoken or signed words for common items. <i>LDC-7c</i></li> </ul>	<ul style="list-style-type: none"> <li>• Show steady increase in words used (e.g., name family members and familiar objects). <i>LDC-7d</i></li> <li>• Imitate parts of familiar songs, chants, or rhymes. <i>LDC-7e</i></li> <li>• Respond to simple words and phrases that they hear often. <i>LDC-7f</i></li> <li>• Use several words to make requests (e.g., “done,” “wannit,” “please”) as well as to label people and objects. <i>LDC-7g</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use new words each day and have a word for almost all familiar people, objects, actions, and conditions (hot, rainy, sleepy). <i>LDC-7h</i></li> <li>• Participate in or repeat familiar songs, chants, or rhymes. <i>LDC-7i</i></li> <li>• Show they understand many new vocabulary words and a variety of concepts (big and little, in and out). <i>LDC-7j</i></li> </ul>	<ul style="list-style-type: none"> <li>• Repeat familiar songs, chants, or rhymes. <i>LDC-7k</i></li> <li>• Use more than one word for the same object and use words for parts of objects (e.g., dog, beagle, Rover; arm, leg). <i>LDC-7l</i></li> <li>• Make up names for things using words they know (e.g., dog doctor for veterinarian). <i>LDC-7m</i></li> <li>• Use many kinds of cues in the environment to figure out what words mean. <i>LDC-7n</i></li> </ul>	<ul style="list-style-type: none"> <li>• Repeat familiar songs, chants, or rhymes. <i>LDC-7o</i></li> <li>• Use a growing vocabulary that includes many different kinds of words to express ideas clearly. <i>LDC-7p</i></li> <li>• Infer the meaning of different kinds of new words from the context in which they are used (for example, hear “sandals” and “boots” used to describe two pairs of shoes, and infer that the unfamiliar shoes must be sandals because they know that the other pair of shoes are boots). <i>LDC-7q</i></li> </ul>

Young children first learn vocabulary words for people, objects, and activities. Later, children begin to learn words for more abstract concepts or things they don't experience directly. Dual Language Learners develop vocabulary first in their home language. As they begin to learn their second language, they will build their vocabulary the same way as their home language—learning words that relate to things and people they experience first, followed by words that are more abstract. They may mix words from their home language and words from their second language as their vocabulary grows. This is typical for children who are learning two languages.

# Learning to Communicate

1. Make sure babies can see or feel your mouth when you hold them. Then, make sounds or repeat the sounds babies make.
2. Respond to infants when they look at you, cry, smile, coo, say words, and reach or move toward you. Talk to them, pick them up, and imitate their sounds back to them. Show them you enjoy these conversations.
3. Take turns with infants and toddlers through talking, actions, and playing games like “peek-a-boo” or other communication games from their culture. Ask family members to teach you some of these games.
4. Smile big, make silly faces, use high and low voices, and hug infants and toddlers. Use many hand gestures and sign language appropriate for infants and toddlers, like waving your hand when saying, “Come here.”
5. Take infants and toddlers outdoors to listen to different sounds. Point out the sounds by saying things like, “Hear the fire truck!” or “Listen to the buzzing bees!”
6. Even if you don’t fluently speak the child’s home language, learn to say at least a few words. Learn greetings, words for favorite people and things, and words or phrases for common events and routines.
7. Play audio recordings of family members’ voices in their own language for infants and toddlers to hear. This will help infants and toddlers feel connected to their families.
8. Use a variety of words when you talk, including labels for things, action words, and many descriptive words. (“Look at the squirrel with the long, fluffy tail! It is running and jumping all over the yard.”)
9. Describe what you are doing and what infants and toddlers are doing. (“I’m putting lunch in the oven right now. I can see you are all ready because you are waiting for me at the table.”)

10. When you speak, make your tone and facial expression match what you are saying. (For example, use a serious tone and don't smile when saying, "We don't hit our friends. Hitting hurts.")
11. Imitate and repeat the child's motions, sounds, and attempts at words in different languages and in a positive and encouraging manner.
12. Recognize that young infants do not cry or act out in order to be naughty or to make you angry. They are simply learning to communicate their wants and needs. Try to meet their needs or wants.
13. Realize that toddler behaviors such as biting or tantrums may happen because they do not yet have the words to communicate. Help toddlers to calm down and give them words for their feelings.
14. Encourage children to try out new sounds and words, including words in different languages (family language, school language, and/or other language).
15. Talk with infants and toddlers in a positive tone and speak in an encouraging way about what they are hearing, seeing, feeling, smelling, and tasting. Talk about printed words they see related to these experiences.
16. Be an appropriate language model by using correct grammar and a variety of different words. Show infants and toddlers how to participate in conversations by having many conversations with them and with other children and adults.
17. Sing songs, say rhymes, and do finger plays with infants and toddlers in English and other languages.

# Learning to Communicate

1. Use facial expressions, gestures, and a rich and varied vocabulary when speaking and reading with children.
2. For Dual Language Learners, repeat common phrases frequently, slowly, and clearly.
3. Introduce new words and concepts by labeling what children are doing and experiencing.
4. Before reading a book or introducing a new concept, determine which words the Dual Language Learners in your class might not know that are important to understand the book. Plan strategies to teach these words. For instance, say the word in their home language first before introducing it in English and/or use pictures or objects to illustrate what the word means.
5. Use the new words you have introduced in a variety of contexts during the day. Be intentional in your use of new words and phrases so children, especially Dual Language Learners, are repeatedly exposed to these words and phrases.
6. Learn new words in the child's family language and use them when introducing new concepts.
7. Give children clear instructions that help them move from simple directions to a more complex sequence. State directions positively, respectfully, carefully, and only as needed.
8. Use visual cues such as props, demonstrations, and gestures to help children understand instructions, especially children who are just beginning to learn English and children with disabilities who have limited language skills.
9. Engage children in conversations in small groups so you are able to monitor their understanding and they have more opportunities to express themselves than in the large group.
10. Engage children frequently in one-on-one conversations; listen and respond to what they are saying. Show interest by sitting face to face at the child's level and maintaining eye contact.

11. Help children discriminate sounds in spoken language through rhymes, songs, and word games, using various media (e.g., CDs and tapes of music and stories).
12. Model good conversational skills and encourage children to use them (e.g., encourage children not to interrupt others, help children to clarify what they are saying when they feel misunderstood).
13. Model and provide opportunities for children to communicate in different ways (e.g., home languages and also manual signs, gestures, pictures, and devices).
14. Encourage opportunities for Dual Language Learners to interact with peers. Help them communicate with English-speaking peers by offering words, showing them how to use gestures, etc.
15. Encourage children to describe their family, home, community, and classroom. Expand on what they say by adding information, explanations, and descriptions.
16. Help children remain focused on the main topic of conversation by redirecting and restating current ideas.
17. Ask open-ended questions that encourage conversation and stimulate children's creativity. Take into consideration Dual Language Learners' process of second language acquisition when asking questions (see section on DLLs). Even if they cannot respond to open-ended questions in complete sentences in English yet, they might be able to respond with a familiar word.
18. Allow enough wait time for children respond to questions.
19. Make the value of bilingualism explicit in the classroom. Reinforce children's use of another language.

# Foundations for Reading

## Goal LDC-8: Children develop interest in books and motivation to read.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Pat and chew on tactile books. <i>LDC-8a</i></li> <li>Look at pictures of faces and simple objects. <i>LDC-8b</i></li> <li>Listen to simple and repetitive books, stories, and songs. <i>LDC-8c</i></li> </ul>	<ul style="list-style-type: none"> <li>Engage in reading behaviors independently (choose books, turn pages (but not always in order, tell the story). <i>LDC-8d</i></li> <li>Show interest in books (e.g., tactile and picture books). <i>LDC-8e</i></li> <li>Listen to simple and repetitive books, stories, and songs for a brief period of time. <i>LDC-8f</i></li> <li>Carry books around, “name” them, and select books for adults to read out loud. <i>LDC-8g</i></li> </ul>	<ul style="list-style-type: none"> <li>Engage in reading behaviors independently (choose books, turn pages but not always in order, tell the story). <i>LDC-8h</i></li> <li>Listen for short periods of time to storybooks, informational books stories, poetry, songs and finger plays. <i>LDC-8i</i></li> </ul>	<ul style="list-style-type: none"> <li>Engage in reading behaviors independently (choose books, turn pages but not always in order, tell the story). <i>LDC-8j</i></li> <li>Show an interest in books, other print, and reading-related activities. <i>LDC-8k</i></li> <li>Listen to and discuss storybooks, simple information books, and poetry. <i>LDC-8l</i></li> </ul>	<ul style="list-style-type: none"> <li>Engage in reading behaviors independently with increased focus for longer periods of time. <i>LDC-8m</i></li> <li>Use and share books and print in their play. <i>LDC-8n</i></li> <li>Listen to and discuss increasingly complex storybooks, information books, and poetry. <i>LDC-8o</i></li> </ul>

Teachers and caregivers who model reading with different types of books and provide different types of book-reading experiences inspire children to want to learn to read. Children who are developing the motivation to read often want to hear the same book read over and over. This is a sign that they are developing an interest in books and starting to understand the importance of reading.

## Goal LDC-9: Children comprehend and use information presented in books and other print media.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<ul style="list-style-type: none"> <li>Listen to and repeat parts of simple and repetitive books, stories, songs, and finger plays. <i>LDC-9a</i></li> <li>Allow entire short book to be “read” with willingness to look at most pages. <i>LDC-9b</i></li> <li>Make appropriate sounds when looking at pictures (say, “Quack, quack” when looking at a duck, “Vrrrrrooom” when looking at a car). <i>LDC-9c</i></li> </ul>	<ul style="list-style-type: none"> <li>Chime in on a repeated line in a book while being read to by an adult. <i>LDC-9d</i></li> <li>Pretend to read familiar books from memory; repeat familiar phrases while looking at a book. <i>LDC-9e</i></li> <li>Begin to relate personal experiences to events described in familiar books. <i>LDC-9f</i></li> <li>Answer simple questions about stories. <i>LDC-9g</i></li> <li>Imitate the special language in storybooks and story dialogue (repetitive language patterns, sound effects, and words from familiar stories). <i>LDC-9h</i></li> </ul>	<ul style="list-style-type: none"> <li>Imitate the special language in storybooks and story dialogue with some accuracy and detail. <i>LDC-9i</i></li> <li>With prompting and support, use books and other media that communicate information to learn about the world by looking at pictures, asking questions, and talking about the information. <i>LDC-9j</i></li> <li>Use their knowledge of the world (what things are, how things work) to make sense of stories and information texts. <i>LDC-9k</i></li> <li>Relate personal experiences to events described in familiar books, with prompting and support. <i>LDC-9l</i></li> <li>Ask questions about a story or the information in a book. <i>LDC-9m</i></li> <li>With prompting and support, discuss storybooks by responding to questions about what is happening and predicting what will happen next. <i>LDC-9n</i></li> </ul>	<ul style="list-style-type: none"> <li>Imitate the special language in storybooks and story dialogue with accuracy and detail. <i>LDC-9o</i></li> <li>Use informational texts and other media to learn about the world, and infer from illustrations, ask questions and talk about the information. <i>LDC-9p</i></li> <li>Use knowledge of the world to make sense of more challenging texts. <i>LDC-9q</i></li> <li>Relate personal experiences to an increasing variety of events described in familiar and new books. <i>LDC-9r</i></li> <li>Ask more focused and detailed questions about a story or the information in a book. <i>LDC-9s</i></li> <li>Discuss storybooks by responding to questions about what is happening and predicting what will happen next. <i>LDC-9t</i></li> </ul>

## Goal LDC-10: Children develop book knowledge and print awareness.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Explore books and paper by tasting, mouthing, crumpling, banging, and patting. <i>LDC-10a</i></li> <li>Look at pictures while cuddling with caregiver. <i>LDC-10b</i></li> </ul>	<ul style="list-style-type: none"> <li>Turn pages (but not always in the right order); point to and label pictures in books; sometimes treat pictures as real (licking a picture of ice cream, rubbing “fur” of a cat in a book). <i>LDC-10c</i></li> <li>Identify some environmental print and logos (favorite cereal box, a sign for a familiar store). <i>LDC-10d</i></li> </ul>	<ul style="list-style-type: none"> <li>Hold a book upright, turn some pages front to back (but not always in the right order), close book, and say, “done” or “the end.” <i>LDC-10e</i></li> <li>Demonstrate understanding of the need for and the uses of print (pretend to read a “grocery list” during play; say, “I want chicken” when looking at a menu). <i>LDC-10f</i></li> <li>Demonstrate an understanding of realistic symbols such as photographs, and later abstract symbols such as signs and environmental print (know which pictures stand for which activities on a daily schedule; say, “That means light” when looking at a symbol of a light bulb located over the light switch). <i>LDC-10g</i></li> </ul>	<ul style="list-style-type: none"> <li>Hold a book upright while turning pages one by one front to back, but not always in order. <i>LDC-10h</i></li> <li>With prompting and support, recognize print occurs in different forms and is used for a variety of functions (sign naming block structure, “message” on card for family member). <i>LDC-10i</i></li> <li>Demonstrate an understanding that print can tell people what to do (such as print and symbols to organize classroom activities—where to store things, when they will have a turn). <i>LDC-10j</i></li> </ul>	<ul style="list-style-type: none"> <li>Hold a book upright while turning pages one by one from front to back. <i>LDC-10k</i></li> <li>Recognize print in different forms for a variety of functions (writing message to friend, pointing to print and saying, “Those words tell the story.”). <i>LDC-10l</i></li> <li>Recognize print and symbols used to organize classroom activities and show understanding of their meaning (put toys in box with correct symbol and name; check sign-up sheet for popular activity; check schedule to learn next activity). <i>LDC-10m</i></li> <li>With prompting and support, run their finger under or over print as they pretend to read text. <i>LDC-10n</i></li> <li>Demonstrate understanding of some basic print conventions (the concept of what a letter is, the concept of words, directionality of print). <i>LDC-10o</i></li> <li>Identify their name and the names of some friends when they see them in print. <i>LDC-10p</i></li> </ul>

Different languages have different “print conventions” or ways of printing the text on the page. For instance, writing in some languages is read from left to right, and writing from other languages is read from right to left. Dual Language Learners may learn about how print works in more than one language. Teachers and caregivers should be aware of these differences when helping children learn book knowledge and print awareness skills.

## Goal LDC-11: Children develop phonological awareness.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Imitate and take turns with caregivers making different sounds. <i>LDC-11a</i></li> </ul>	<ul style="list-style-type: none"> <li>Focus on and enjoy playing with repetitive sounds, words, rhymes, and gestures. <i>LDC-11b</i></li> </ul>	<ul style="list-style-type: none"> <li>Participate in rhyming games. <i>LDC-11c</i></li> <li>Notice sounds that are the same and different. <i>LDC-11d</i></li> <li>Participate in experiences using rhythmic patterns in poems and songs using words, clapping, marching, and/or using instruments. <i>LDC-11e</i></li> </ul>	<ul style="list-style-type: none"> <li>Participate in experiences with songs, poems, and books that have rhyme and wordplay, and learn words well enough to complete refrains and fill in missing words and sounds. <i>LDC-11f</i></li> <li>Repeat rhythmic patterns in poems and songs using words, clapping, marching, and/or using instruments. <i>LDC-11g</i></li> <li>Play with the sounds of language and begin to identify rhymes (make up silly-sounding words, repeat rhyming words). <i>LDC-11h</i></li> </ul>	<ul style="list-style-type: none"> <li>Enjoy rhymes and wordplay, and sometimes add their own variations. <i>LDC-11i</i></li> <li>Repeat a variety of rhythmic patterns in poems and songs using words, clapping, marching, and/or instruments to repeat the rhythm or beat syllables. <i>LDC-11j</i></li> <li>Play with the sounds of language, identify a variety of rhymes, create some rhymes, and recognize the first sounds in some words. <i>LDC-11k</i></li> <li>Associate sounds with specific words, such as awareness that different words begin with the same sound. <i>LDC-11l</i></li> </ul>

Children benefit from playful experiences where they hear lots of different types of sounds. However, it's important to remember that phonological skills emerge later in the preschool period, so teachers and caregivers should provide little/limited formal instruction for phonological awareness. Remember too that Dual Language Learners will have more opportunities to hear and process sounds in their home language than their second language, so they often are more aware of and able to produce sounds from their home language.

**Goal LDC-12: Children begin to develop knowledge of the alphabet and the alphabetic principle.**

**Developmental Indicators**

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<i>Emerging</i>	<ul style="list-style-type: none"> <li>• Demonstrate an interest in letters by asking about and/or naming some of them. <i>LDC-12a</i></li> </ul>	<ul style="list-style-type: none"> <li>• Demonstrate an interest in learning the alphabet. <i>LDC-12b</i></li> <li>• Recognize letters of the alphabet as a special category of print, different from pictures, shapes, and numerals. <i>LDC-12c</i></li> <li>• Recognize and name some letters of the alphabet, especially those in their own name. <i>LDC-12d</i></li> </ul>	<ul style="list-style-type: none"> <li>• Demonstrate an interest in learning the alphabet. <i>LDC-12e</i></li> <li>• Show they know that letters function to represent sounds in spoken words. <i>LDC-12f</i></li> <li>• Recognize and name several letters of the alphabet, especially those in their own name and in the names of others who are important to them. <i>LDC-12g</i></li> <li>• Make some sound-to-letter matches, using letter name knowledge (notice the letter B with picture of ball and say, “Ball”; say, “A-a-apple.”). <i>LDC-12h</i></li> <li>• Associate sounds with the letters at the beginning of some words, such as awareness that two words begin with the same letter and the same sound. <i>LDC-12i</i></li> </ul>

## Strategies for Infants and Toddlers

# Foundations for Reading

1. Provide daily lap reading time.
2. Read and share books with small groups of infants and toddlers every day. Look at and talk about pictures and read simple stories. Choose books about things infants and toddlers are interested in (families, pets, trees, flowers).
3. Include books that show children with disabilities in a natural way as part of the stories and pictures.
4. Make available books that reflect children's sociocultural experiences at home and their communities.
5. Give infants and toddlers access to books throughout the day. Provide books that children can put in their mouths and books with pages that turn easily, such as cloth and board books.
6. Place clear pictures of children and everyday objects throughout the room. Talk and sing about pictures in books and in the room.
7. Make books using pictures of family members and other familiar objects found in magazines, catalogs, and environmental print (such as pictures from catalog cut-outs and labels from favorite foods). Make books of trips, events you have shared, and children's art.
8. Share nursery rhymes, sing songs, and read simple poems in different languages.
9. Make stories come alive by using different voices and body movements.
10. Ask simple questions and make comments about books to start conversations with children. Talk about similar things that young children may have experienced. ("Do you have a pet?" "What did you see at the zoo?") Welcome and encourage children's questions too!
11. Help children tell stories and act out parts of stories they have heard using words, pictures, movement, puppets, and toys.
12. Place appealing books, signs, and posters in all interest areas indoors and outdoors at children's eye level.
13. Point out words in books and in the environment (street signs, toy boxes, words on pictures in room).
14. Model respect for books and help children care for books.
15. Introduce a new book in the children's family language first before reading it in English. If you do not speak the language, ask a parent or community member to read aloud.

# Foundations for Reading

1. Provide and share fiction and non-fiction books that stimulate children's curiosity.
2. Create comfortable and inviting spaces in different parts of the classroom for children to read; stock these reading nooks with a variety of reading materials.
3. Provide time when children are encouraged to look at books on their own.
4. Promote positive feelings about reading. Allow children to choose books they want to read. Reread favorite books.
5. Make multicultural books and materials available to help children develop an awareness of individual differences and similarities.
6. Create a connection between home and school through such means as developing a take-home book program, sharing books from home, engaging parents in literacy experiences, holding workshops, or creating a newsletter for parents. Make sure you send books home in the family language.
7. Provide multi-sensory approaches to assist reading (e.g., tape players, computers, and assistive technology).
8. Point out authors and illustrators; discuss what makes a book a favorite book.
9. Provide children with materials they can use to act out and retell stories (flannel board cutouts, puppets, dolls, props, pictures, etc.).
10. Respond to children's observations about books and answer their questions.
11. Reread books multiple times, changing the approach as children become familiar with the book. On occasion, ask questions that tap their understanding of why characters are doing things and talk about the meaning of unfamiliar words.
12. Make books available in children's home languages. Help children identify the language of the book and point out to children the differences and similarities in script.
13. Make available books that reflect children's sociocultural experiences at home and their communities.
14. Include strategies for promoting phonological awareness, print and alphabet knowledge within daily conversation, activities, and routines.
15. Discuss letter names in the context of daily activities (as opposed to teaching one letter per week) and provide opportunities for children to hear specific letter sounds, particularly beginning sounds.
16. Introduce a new book in the children's family language first before reading it in English. If you do not speak the language, ask a parent or community member to read aloud.
17. Ensure that Dual Language Learners can participate in reading aloud even if they do not have the English proficiency to do so. For example, ask them to point to pictures, make gestures, repeat words and phrases, etc.

# Foundations for Writing

**Goal LDC-13: Children use writing and other symbols to record information and communicate for a variety of purposes.**

## Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<ul style="list-style-type: none"> <li>• Make marks, scribble, and paint (e.g., cover easel paper with big crayon or paint marks, make marks with marker or crayon). <i>LDC-13a</i></li> </ul>	<ul style="list-style-type: none"> <li>• Pretend to write in ways that mimic adult writing (e.g., scribble on paper while sitting with caregiver who is writing, hold phone to ear and make marks with pencil). <i>LDC-13b</i></li> </ul>	<ul style="list-style-type: none"> <li>• Represent thoughts and ideas through marks, scribbles, drawings, and paintings (draw a picture of something they did during the day, indicate what they want for lunch with a mark under the picture of the food they want). <i>LDC-13c</i></li> <li>• With prompting and support, communicate their thoughts for an adult to write. <i>LDC-13d</i></li> <li>• Engage in writing behaviors that imitate real-life situations (e.g., make marks to take food order during pretend restaurant play). <i>LDC-13e</i></li> </ul>	<ul style="list-style-type: none"> <li>• Represent thoughts and ideas in drawings and by writing letters or letter-like forms. <i>LDC-13f</i></li> <li>• Communicate their thoughts for an adult to write. <i>LDC-13g</i></li> <li>• Independently engage in writing behaviors for various purposes (e.g., write symbols or letters for names, use materials at writing center, write lists with symbols/letters in pretend play, write messages that include letters or symbols). <i>LDC-13h</i></li> </ul>

## Goal LDC-14: Children use knowledge of letters in their attempts to write.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<i>Emerging</i>	<i>Emerging</i>	<ul style="list-style-type: none"><li>• Begin to use letters and approximations of letters to write their name. <i>LC-14a</i></li><li>• Show they know that written words are made up of particular letters (point to the first letter of their own name, find the first letter of their own name in a list of letters). <i>LC-14b</i></li></ul>	<ul style="list-style-type: none"><li>• Use known letters and approximations of letters to write their own name and some familiar words. <i>LC-14c</i></li><li>• Try to connect the sounds in a spoken word with letters in the written word (write “M” and say, “This is Mommy.”). <i>LC-14d</i></li></ul>

Children’s first attempts to write look more like squiggly lines. Over time, they begin to use marks that look more and more like letters, but initially their letters may be just random letters (not really a part of the word they are trying to write) and/or look different from how adults write. Their letters may be upside down, sideways, and/or running together. Gradually, with practice, the letters they use will look more like conventional writing, but many children still will be using only some letters and writing them in different ways on the page at the end of the older preschool period.

## Goal LDC-15: Children use writing skills and conventions.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<ul style="list-style-type: none"> <li>• Hold marker or crayon with the fist. <i>LC-15a</i></li> <li>• Dot or scribble with crayons, may progress to vertical lines. <i>LC-15b</i></li> </ul>	<ul style="list-style-type: none"> <li>• Explore a variety of tools that can be used for writing. <i>LC-15c</i></li> <li>• Scribble and/or imitate an adult's marks with markers, crayons, paints, etc. <i>LC-15d</i></li> <li>• Transition from holding a crayon or marker in their fist to holding it between thumb and forefinger. <i>LC-15e</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use a variety of writing tools and materials with purpose and control (pencils, chalk, markers, crayons, paintbrushes, finger paint, computers). <i>LC-15f</i></li> <li>• Make marks they call "writing" that look different from drawings (vertical series of marks for a "grocery list," horizontal line of marks for a "story"). <i>LC-15g</i></li> <li>• Play with writing letters and make letter-like forms. <i>LC-15h</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use a variety of writing tools and materials with increasing precision. <i>LC-15i</i></li> <li>• Imitate adult writing conventions that they have observed (write groups of letter-like forms separated by spaces, try to write on a line, press Enter key on computer after typing a series of "words"). <i>LC-15j</i></li> <li>• Use some conventional letters in their writing. <i>LC-15k</i></li> </ul>

Teachers and caregivers should encourage children to learn to write by modeling writing, providing opportunities to pretend or practice writing when they are playing, and letting them draw and color with different types of writing materials. Experiences that are fun and use writing as a way to communicate (rather than just for the sake of practicing letters) are the best way to teach writing skills. Children with fine motor delays may need adaptations such as larger crayons or special pencil grips. For Dual Language Learners it is important that teachers ask children in which language they are writing, so children can become aware of the differences between writing in each language.

# Foundations for Writing

1. Provide crayons and other art materials for infants and toddlers to explore. Adapt art materials if needed so children with disabilities can use them.
2. Model the use of reading, writing, and drawing in everyday activities.
3. Bring books, paper, and writing/drawing tools outside for children to use and enjoy.
4. Make sure that children often see their name in writing, such as on their cubby/personal space, on all personal belongings, and on their artwork or other creations if they wish.
5. For older toddlers, point out a few familiar letters such as the first letter in a child's name and call attention to them occasionally. If a child asks for a letter name, provide it. *Do not* drill toddlers on reciting the alphabet or naming letters.
6. Promote literacy-related play activities that reflect children's interests and sociocultural experiences by supplying materials such as telephone books, recipe cards, shopping lists, greeting cards, and storybooks for use in daily activities.
7. Encourage children to retell experiences and events that are important to them through pictures and dictation.
8. Write down what children say and share those dictated writings with them.
9. Assist children in making their own books and class books.

# Foundations for Writing

1. Give children frequent opportunities to draw, scribble, and print for a variety of purposes.
2. Provide a variety of tools, such as markers, crayons, pencils, chalk, finger paint, and clay. Provide adaptive writing/drawing instruments and computer access to children with disabilities.
3. Promote literacy-related play activities that reflect children's interests and sociocultural experiences by supplying materials such as telephone books, recipe cards, shopping lists, greeting cards, and storybooks for use in daily activities.
4. Provide a variety of writing tools and props in centers (e.g., stamps and envelopes for the post office; blank cards, markers, and tape for signs in the block center).
5. Help children use writing to communicate by stocking the writing center with letters and cards that have frequently used and requested words (e.g., "love," "Mom," "Dad," and children's names with photos).
6. Show step-by-step how to form a letter on unlined paper when a child asks.
7. Encourage children to retell experiences and events that are important to them through pictures and dictation.
8. Write down what children say and share those dictated writings with them.
9. Think aloud (or describe step-by-step what you are doing) as you model writing for a variety of purposes in classroom routines (e.g., thank-you notes, menus, recipes).
10. Assist children in making their own books and class books.
11. Display children's writing and comment on their successes.
12. Discuss letter names in the context of daily activities (as opposed to teaching one letter per week) and provide opportunities for children to hear specific letter sounds, particularly beginning sounds.
13. Use unlined paper for children's writing so they will focus on letter formation instead of letter orientation.
14. Provide multiple opportunities for children to experiment writing their name (e.g. sign-in list, waiting list, labeling pictures, graphs, etc.).
15. Encourage children to write without an adult model for a variety of purposes (e.g. label their drawings, leave a note to a friend, shopping list, etc.).
16. Ask children if they have written in English or in another language to help them begin to understand that writing in one language is different from writing in another language.

# Cognitive Development (CD)

Subdomains
Construction of Knowledge: Thinking and Reasoning
Creative Expression
Social Connections
Mathematical Thinking and Expression
Scientific Exploration and Knowledge

**T**he **Cognitive Development** domain focuses on children's ability to acquire, organize, and use information in increasingly complex ways. In their search for understanding and meaning, young children play an active role in their own cognitive development. They begin to explain, organize, construct, and predict—skills that lay the cognitive foundation needed to explore and understand increasingly sophisticated concepts and the world they live in. They learn to apply prior knowledge to new experiences, and then use this information to refine their understanding of concepts as well as form new understanding.

For very young children, cognitive development is supported and encouraged through their relationships with others. It happens through daily activities, routines, and interactions with adults and other children. Through relationships, children become aware of things in the physical environment, as well as other people. Relationships facilitate children's growing awareness of self, family, and community. They begin to understand that their actions have an effect on their environment and are able to think about things that are not present. They typically learn a great deal about themselves and form ideas about family roles and community

helpers. They also begin to understand simple scientific concepts by noticing, wondering, and exploring.

As children grow older and move into the preschool years, their thinking becomes increasingly complex. They move from simpler to more complex cognitive skills and become more effective thinkers. They begin to ask questions as they engage in increasingly more focused explorations. They begin to demonstrate good problem-solving skills and also begin to express themselves creatively using a variety of media. They also begin to remember and use what they learn in the areas of mathematics, science, creative expression, and social connections, the focus of four subdomains within the Cognitive Development domain. As you read through this domain, you will begin to notice the interrelatedness among subdomains. Processes and skills such as making observations, comparing and classifying objects, solving problems, asking questions, and making predictions support learning across all of the domains and link them together.

Many factors can be related to the progress children demonstrate in the Cognitive Development domain. For instance, some

children's home environments provide many opportunities to explore and learn new concepts, while other children's homes may be less stimulating. Children with disabilities may need extra support to make progress on the Developmental Indicators in this domain because individual differences in how they see, hear, process information, and/or communicate can affect how they take in information and how they express what they learn. Similarly, Dual Language Learners may learn new concepts and demonstrate what they know best in their home language.

Teachers and caregivers can promote children's cognitive development by providing interesting materials and experiences, and encouraging children to explore and try using the materials in different ways. Whether it's toys that require children to figure out how they work, art materials, or blocks they put together in different shapes, almost any experience can be used to support children's understanding of the concepts included in the Cognitive Development domain.

# Cognitive Development (CD)

## **Construction of Knowledge: Thinking and Reasoning**

- Goal CD-1: Children use their senses to construct knowledge about the world around them.
- Goal CD-2: Children recall information and use it for new situations and problems.
- Goal CD-3: Children demonstrate the ability to think about their own thinking: reasoning, taking perspectives, and making decisions.

## **Creative Expression**

- Goal CD-4: Children demonstrate appreciation for different forms of artistic expression.
- Goal CD-5: Children demonstrate self-expression and creativity in a variety of forms and contexts, including play, visual arts, music, drama, and dance.

## **Social Connections**

- Goal CD-6: Children demonstrate knowledge of relationships and roles within their own families, homes, classrooms, and communities.
- Goal CD-7: Children recognize that they are members of different groups (e.g. family, preschool class, cultural group).
- Goal CD-8: Children identify and demonstrate acceptance of similarities and differences between themselves and others.
- Goal CD-9: Children explore concepts connected with their daily experiences in their community.

## Cognitive Development (CD)(continued)

### Mathematical Thinking and Expression

- Goal CD-10: Children show understanding of numbers and quantities during play and other activities.
- Goal CD-11: Children compare, sort, group, organize, and measure objects and create patterns in their everyday environment.
- Goal CD-12: Children identify and use common shapes and concepts about position during play and other activities.
- Goal CD-13: Children use mathematical thinking to solve problems in their everyday environment.

### Scientific Exploration and Knowledge

- Goal CD-14: Children observe and describe characteristics of living things and the physical world.
- Goal CD -15: Children explore the natural world by observing, manipulating objects, asking questions, making predictions, and developing generalizations.

# Construction of Knowledge: Thinking and Reasoning

**Goal CD-1: Children use their senses to construct knowledge about the world around them.**

## Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Discover different shapes, sizes and textures by exploring (put toys in mouth, crawl over pillows, pick up large objects). <i>CD-1a</i></li> <li>Turn head or move toward sounds. <i>CD-1b</i></li> </ul>	<ul style="list-style-type: none"> <li>Actively explore objects by handling them in many ways (moving, carrying, filling, dumping, smelling, and putting in mouth). <i>CD-1c</i></li> <li>Explore space with their bodies (fit self into large box, crawl under table, climb over low walls). <i>CD-1d</i></li> </ul>	<ul style="list-style-type: none"> <li>Explore objects and materials physically to learn about their properties. <i>CD-1e</i></li> <li>Experiment with safe tools to learn how they work (wooden hammer with pegs, sifter, funnel). <i>CD-1f</i></li> <li>Express knowledge gathered through their senses through play (imitate something they have seen an adult do, show they understand how to sort by sorting toys as they are playing). <i>CD-1g</i></li> </ul>	<ul style="list-style-type: none"> <li>Explore objects, tools, and materials systematically to learn about their properties (weigh an object, observe something from the top of the object to the bottom). <i>CD-1h</i></li> <li>Express knowledge gathered through their senses using play, art, language, and other forms of representation. <i>CD-1i</i></li> <li>Group familiar objects that go together (shoe and sock, brush and paint, hammer and nail). <i>CD-1j</i></li> </ul>	<ul style="list-style-type: none"> <li>Explore objects, tools, and materials systematically to learn about their properties (weigh an object, observe something from the top of the object to the bottom). <i>CD-1k</i></li> <li>Express knowledge gathered through their senses using play, art, language, and other forms of representation. <i>CD-1l</i></li> <li>Distinguish appearance from reality (the person behind a mask is still the same person; recognize that a fantasy story could not be real). <i>CD-1m</i></li> <li>Organize and use information through matching, grouping, and sequencing. <i>CD-1n</i></li> </ul>

## Goal CD-2: Children recall information and use it for new situations and problems.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Search for objects that are hidden or partly hidden. <i>CD-2a</i></li> <li>Respond differently to familiar vs. unfamiliar people, objects, and situations (reach for new interesting toy instead of old familiar toy; move toward familiar caregiver but hide head on parent's shoulder when new person comes near). <i>CD-2b</i></li> <li>Anticipate routine events (smile, wave arms and legs, move toward adult holding bottle). <i>CD-2c</i></li> <li>Repeat an action to make something happen again (make sounds when music stops, bounce up and down to get adult to continue "horsey ride"). <i>CD-2d</i></li> <li>Observe and imitate sounds, movements, and facial expressions, including things they have seen in the past or in other places. <i>CD-2e</i></li> </ul>	<ul style="list-style-type: none"> <li>Search in several places where an object has been hidden recently. <i>CD-2f</i></li> <li>Notice a change in familiar objects, places, or events (frown at parent with a new haircut, look for furniture that was moved). <i>CD-2g</i></li> <li>Perform routine events and use familiar objects in appropriate ways (carry clean diaper to changing table, talk on phone, "water" plants with pitcher). <i>CD-2h</i></li> <li>Imitate behaviors they have seen in the past or in other places. <i>CD-2i</i></li> <li>Identify objects and people in pictures by pointing or looking. <i>CD-2j</i></li> </ul>	<ul style="list-style-type: none"> <li>Search for objects in several places, even when not seen recently. <i>CD-2k</i></li> <li>Show they remember people, objects, and events (tell about them, act them out, point out similar happenings). <i>CD-2l</i></li> <li>Show they remember the order in which familiar events happen (finish line in story or song, get ready to go outdoors after snack). <i>CD-2m</i></li> <li>Choose objects to represent something else with similar features during play (block for cell phone, large sheet for tent). <i>CD-2n</i></li> </ul>	<ul style="list-style-type: none"> <li>Recognize whether a picture or object is the same as or different from something they have seen before. <i>CD-2o</i></li> <li>Apply what they know about everyday experiences to new situations (look for the seatbelt on the bus). <i>CD-2p</i></li> <li>Describe or act out a memory of a situation or action, with adult support. <i>CD-2q</i></li> <li>Make predictions about what will happen using what they know. <i>CD-2r</i></li> <li>Introduce ideas or actions in play based on previous knowledge or experience. <i>CD-2s</i></li> <li>Ask questions about why things happen and try to understand cause and effect. <i>CD-2t</i></li> </ul>	<ul style="list-style-type: none"> <li>Demonstrate their ability to apply what they know about everyday experiences to new situations. <i>CD-2u</i></li> <li>Describe past events in an organized way, including details or personal reactions. <i>CD-2v</i></li> <li>Improve their ability to make predictions and explain why things happen using what they know. <i>CD-2w</i></li> <li>Introduce more elaborate or detailed ideas or actions into play based on previous knowledge or experience. <i>CD-2x</i></li> <li>Try to reach logical conclusions (including conclusions regarding cause and effect) about familiar situations and materials, based on information gathered with their senses. <i>CD-2y</i></li> </ul>

## Goal CD-3: Children demonstrate the ability to think about their own thinking: reasoning, taking perspectives, and making decisions.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Show awareness of others' reactions to people, objects, and events. <i>CD-3a</i></li> <li>• Show awareness of another person's intentions by establishing joint attention (look at an object, then at caregiver, and back at object). <i>CD-3b</i></li> </ul>	<ul style="list-style-type: none"> <li>• Show awareness of others' feelings about things by looking to see how they react. <i>CD-3c</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use words like "think," "remember," and "pretend." <i>CD-3d</i></li> <li>• Talk about what they and other people want or like. <i>CD-3e</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use language to identify pretend or fantasy situations (say, "Let's pretend we're going on a trip." "That's a pretend story."). <i>CD-3f</i></li> <li>• Use words like "think" and "know" to talk about thoughts and beliefs. <i>CD-3g</i></li> <li>• Recognize that beliefs and desires can determine what people do (e.g., a person will look for a missing object based on where they think it is rather than where it actually is). <i>CD-3h</i></li> </ul>	<ul style="list-style-type: none"> <li>• Use language to identify pretend or fantasy situations (say, "Let's pretend we're going on a trip." "That's a pretend story."). <i>CD-3i</i></li> <li>• Express understanding that others may have different thoughts, beliefs, or feelings than their own ("I like ketchup and you don't."). <i>CD-3j</i></li> <li>• Use language to describe their thinking processes with adult support. <i>CD-3k</i></li> </ul>

Teachers and caregivers can encourage and support perspective taking in young children by explaining how another child might feel and/or how the other child might view a situation.

# Construction of Knowledge: Thinking and Reasoning

1. Comfort premature infants if they become overstimulated. Premature infants may look away, fuss, or cry when they experience too much light, sound, or interaction with people. Turn lights low, keep noise down, swaddle gently, and stop interacting with if needed. Provide private space for children who become overstimulated to calm themselves.
2. Provide a variety of sensory experiences for infants and toddlers. Include fresh air; a range of smells, sounds, temperatures, materials to touch and feel; different surfaces (such as vinyl floors, carpet, grass, concrete, sand, and mud) and movement activities.
3. Place non-mobile children where they have opportunities to see and hear new things, see familiar things from different views, and watch or join in with others. Hang clear, simple pictures, mobiles, and unbreakable mirrors where infants and toddlers can see and/or hear them.
4. Make large objects available to toddlers to play with such as empty appliance boxes (check for staples and sharp edges), baskets, or pillows.
5. Welcome questions from children about why things happen. If possible, show them while you explain. (For example, if a child asks, “Where did the ice go?” in a pitcher of water, put out a bowl of ice and invite children to watch what happens.)
6. Give toddlers choices to allow them to communicate likes and dislikes, such as deciding between two toys or choosing which color shirt to wear. For children who cannot point or talk, look for gazes or other gestures that show their likes and dislikes. Encourage use of some version of “yes” or “no” in words, signs, or gestures.
7. Use routines and real-life situations to help infants and toddlers learn. For example, talk about body parts during diapering or “hot” and “cold” while eating. Toddlers learn about things that go together and the concepts of “same” and “different” while sorting laundry and picking up toys.
8. Make extra efforts to help infants and toddlers with disabilities connect concepts and words to their experiences. For example, for an infant who is blind, provide different things to touch, hear, feel and smell as the infant explores. Make sure a child with hearing loss is looking at you and at the object you are communicating about before speaking or signing about it.
9. Allow infants and toddlers to play for long periods of time and repeat activities over and over.
10. Hide toys while infants are watching and encourage them to find them (under a blanket, in your hand, behind the chair).
11. Give toddlers a chance to collect, sort, and organize objects and materials both indoors and outdoors. Make sure children with disabilities and non-mobile infants have access to the same wide variety of materials.
12. Provide toys and household items that pose problems for infants and toddlers to solve, such as empty containers with matching lids, measuring cups, pots and pans, sorters, busy boxes, simple puzzles, and large Duplo® blocks.

# Construction of Knowledge: Thinking and Reasoning

1. Help children participate in activities and enjoy a wide range of sensory experiences, especially for children with sensory impairments. For example, play music with a bass beat that children who are deaf can feel through their bare feet. Make sure children see others moving in time to the music. Remember, some children are overly sensitive to sound, light, or touch. Expose them to new sensory experiences gradually.
2. Take walks around the neighborhood to experience changes in nature. Point out flowers, colored leaves, wind, water, animals, and other items in nature. Observe what children are interested in and provide materials and books to follow their interests.
3. Provide opportunities to play with materials in ways that change them, such as cutting Play-Doh® and squishing it back together or mixing two colors of finger paint.
4. Read and act out stories in which the characters must work to solve challenging problems or make decisions. Talk about what the characters might be thinking or feeling.
5. Introduce a problem and encourage the children to come up with as many solutions as possible. Then ask them to think about possible consequences: "What would happen if they use this solution?"
6. Play games that involve thinking and reasoning, such as "I Spy" or "I'm Thinking of an Animal."
7. Make planning a regular part of your program day. For example, after morning meeting or during breakfast ask children what they would like to do and how they plan to carry it out.
8. Ask open-ended questions that encourage children to think about what they are doing and possible next steps (e.g., "I wonder what would happen if you ...").

9. Set aside a part of each day to talk about and reflect on the day's activities. Gather children into a small group and ask them to share what they have done. Encourage other children to be active listeners.
10. Interpret and expand on what children do and say. Children who are nonverbal or those beginning to learn English may gesture or present materials to indicate what they did. You can add words to their actions, checking with them for cues that indicate you understand their message.
11. Use reflective dialogue and comment on what you see children doing as they play. This encourages children to pay attention to what they are doing and it makes it easier for them to recall the event later.
12. Encourage children to carry over their activities to the next day. For example, if children run into a problem they had not anticipated, they can come up with solutions to try the following day.
13. Be aware that children might be solving problems silently. Allow them time to do so. Invite a child to use words to state, or show you, what the problem is if you believe this will lead them to a solution (don't require them to explain the problem to you).
14. Invite children to tell or retell stories and talk about recent events. Discuss the sequencing and timing of experiences.
15. Promote decision-making for individual and/or class decisions (such as a choice of which author to study next or where to go on a field trip). Talk about what you are thinking or what children might be thinking as decisions are made. ("I know we need to choose what to do next, but I like both of the choices. I think we need to look at our choices to see which will work best ...")

# Creative Expression

## Goal CD-4: Children demonstrate appreciation for different forms of artistic expression.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>• Show wonder or fascination with objects, activities, or experiences (gaze at an object, become quiet or vocal when they hear lullabies, show bodily excitement when they hear music). <i>CD-4a</i></li> <li>• Hold, touch, and experience different textures (fuzzy blanket, smooth skin, rough carpet). <i>CD-4b</i></li> </ul>	<ul style="list-style-type: none"> <li>• Show interest or pleasure in response to images, objects, and music (say, “Aaah” and reach for a brightly colored picture, look at or reach toward fluttering leaves). <i>CD-4c</i></li> <li>• Participate in and explore all possible media (use finger paint, glue scraps of paper on another paper, dance to music). <i>CD-4d</i></li> </ul>	<ul style="list-style-type: none"> <li>• Express pleasure in different forms of art (call something “pretty,” express preferences, choose to look at book of photographs or listen to music again). <i>CD-4e</i></li> <li>• Participate in and describe art, music, dance, drama, or other aesthetic experiences (describe dancers spinning round and round; talk about colors in a painting). <i>CD-4f</i></li> </ul>	<ul style="list-style-type: none"> <li>• Express pleasure in different forms of art (call something “pretty,” express preferences, choose to look at book of photographs or listen to music again). <i>CD-4g</i></li> <li>• Participate in, describe and ask questions about art, music, dance, drama, or other aesthetic experiences (describe dancers spinning round and round; talk about colors in a painting). <i>CD-4h</i></li> </ul>	<ul style="list-style-type: none"> <li>• Express pleasure in different forms of art (call something “pretty,” express preferences, choose to look at book of photographs or listen to music again). <i>CD-4i</i></li> <li>• Participate in, describe and ask questions about art, music, dance, drama, or other aesthetic experiences (describe dancers spinning round and round; talk about colors in a painting). <i>CD-4j</i></li> <li>• Use art-specific vocabulary to express ideas and thoughts about artistic creations more clearly (say, “We need a stage for our puppet show.”). <i>CD-4k</i></li> </ul>

## Goal CD-5: Children demonstrate self-expression and creativity in a variety of forms and contexts, including play, visual arts, music, drama, and dance.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Use toys and household objects in a variety of different ways during play (wave, then scrunch, then throw scarf). <i>CD-5a</i></li> <li>Explore sensory properties of art media (smear paint, pat and pound dough). <i>CD-5b</i></li> <li>Make a variety of sounds with simple instruments, toys, and their own voice. <i>CD-5c</i></li> <li>Express themselves by moving their bodies (wave arms when excited, hug soft toy). <i>CD-5d</i></li> </ul>	<ul style="list-style-type: none"> <li>Use hats and clothes for dress-up make-believe. <i>CD-5e</i></li> <li>Explore art materials freely (make marks, squeeze clay, tear paper). <i>CD-5f</i></li> <li>Use materials purposefully to create sounds (bang blocks together, ring bell, shake can to make contents jingle). <i>CD-5g</i></li> <li>Move to music in their own way. <i>CD-5h</i></li> </ul>	<ul style="list-style-type: none"> <li>Recreate familiar scenes using play materials, language, and actions. <i>CD-5i</i></li> <li>Experiment and create art with clay, crayons, markers, paint, and collage materials. <i>CD-5j</i></li> <li>Make up simple nonsense songs, sign, chant, and dance (sing “la-la-la-la” on two pitches, twirl around and fall down, “march” by lifting knees high). <i>CD-5k</i></li> <li>Express ideas and feelings through music, movement, and dance. <i>CD-5l</i></li> </ul>	<ul style="list-style-type: none"> <li>Choose to participate and express themselves through a variety of creative experiences, such as art, music, movement, dance, and dramatic play. <i>CD-5m</i></li> <li>Show creativity and imagination when using materials and assuming roles during pretend play. <i>CD-5n</i></li> <li>Explore the properties of art materials and use them with purpose to draw, paint, sculpt, and create in other ways. <i>CD-5o</i></li> <li>Show awareness of different musical instruments, rhythms, and tonal patterns as they make music or participate in music activities. <i>CD-5p</i></li> <li>Show awareness of various patterns of beat, rhythm, and movement through music and dance activities. <i>CD-5q</i></li> </ul>	<ul style="list-style-type: none"> <li>Choose to participate and express themselves through a variety of creative experiences, such as art, music, movement, dance, and dramatic play. <i>CD-5r</i></li> <li>Plan and act out scenes based on books, stories, everyday life, and imagination. <i>CD-5s</i></li> <li>Plan and complete artistic creations such as drawings, paintings, collages, and sculptures. <i>CD-5t</i></li> <li>Recall and imitate different musical tones, rhythms, rhymes, and songs as they make music or participate in musical activities (clap previous beat to a new song). <i>CD-5u</i></li> <li>Recall and imitate patterns of beat, rhythm, and movement as they create dances or participate in movement and dance activities. <i>CD-5v</i></li> </ul>

Most children seem to naturally enjoy participating in creative arts activities. Teachers and caregivers support children’s creativity by providing lots of different types of materials and experiences, and then encouraging children to use them in different ways without evaluating what children are doing.

### Creative Expression

1. Provide musical mobiles for infants to watch and listen to.
2. Place pictures and photographs at eye level for infants and toddlers and talk about them. Laminate pictures and attach them to the wall with Velcro® so children can handle them without damage.
3. Display children's artwork at their eye level and go back often to talk about it. Help young children respect their artwork by encouraging them to keep the art on the walls.
4. Provide a wide variety of sensory materials both indoors and outdoors, such as Play-Doh®, goop (cornstarch and water), clay, finger paint, chalk, sand, mud, and wood pieces.
5. Provide materials for drawing, painting, building, molding, and making collages. Choose materials that are suitable for the age and development of the children. For example, use contact paper for collages with children who cannot handle glue.
6. Invite children to talk about the art they create. Recognize that they may not have words for their creations or may not want to describe them. Make specific, non-judgmental comments about what they have done. ("You put a lot of feathers in this corner.")
7. Provide toys that create life scenes like a farm, parking lot, bus station, or school. Use puppets and stuffed animals to act out songs, rhymes, and stories. Encourage children to pretend using these materials
8. Provide dress-up materials to encourage pretend play about a variety of themes (gowns and top hats for a night on the town; hardhats, big boots, and tools for builders; dresses, ties, shoes, and watches for house and office play).
9. Offer creative play activities both indoors and outdoors. For example, children might use chalk on a blackboard indoors or on the sidewalk outdoors. Play music outdoors where children can make large dance movements.
10. Encourage children to move and dance to music in many different ways (march, clap, stomp, gallop, jump, sway). Offer dance props such as scarves, streamers, and shakers for toddlers to twirl and shake.
11. Take pictures of the children doing creative activities. Display these pictures to help children recall what they have done and to help families appreciate the creative process.
12. Give infants and toddlers many opportunities to experience beauty through all their senses (touching snow, looking at rainbows, smelling freshly mowed grass, tasting different foods, listening to birds chirp).
13. Set an example by demonstrating spontaneity, a sense of wonder, and excitement.

# Creative Expression

1. Encourage children to talk about and/or share their creative expressions with others.
2. Provide access to a variety of materials (non-hazardous paints, modeling materials, a wide variety of paper types, writing and drawing utensils of various sizes and types, and collage materials), media, and activities that encourage children to use their imagination and express ideas through art, construction, movement, music, etc.
3. Use a variety of horizontal and vertical surfaces (easels, floor, and walls) and two- and three-dimensional objects (boxes, clay, and plastic containers) for creative expression.
4. Develop classroom procedures that encourage children to move materials from one learning center to another (such as using markers and paper in a dramatic play area).
5. Use an abundance of multicultural books, pictures, tapes, and CDs in the classroom.
6. Take children to museums, galleries, plays, concerts, and other appropriate cultural activities.
7. Invite parents, authors, artists, musicians, and storytellers from different cultural and language backgrounds to the classroom so children can observe firsthand the creative work of a variety of people in the arts.
8. Give children opportunities to respond through music, movement, dance, dramatic play, and art (e.g., following expressive movement experiences, ask them to draw a picture of themselves and then tell you about the picture).
9. Provide appropriate instruments (e.g., maracas, rhythm sticks, bells, tambourines, drums, sand blocks, shakers) for musical experimentation.
10. Play music, provide materials such as scarves, streamers, and bells, and make room indoors and outdoors for children to move freely.
11. Encourage children to move and use their bodies in space (e.g., pretending to be a cat, a volcano, or a butterfly). Assist children with modeling movement positions as needed.
12. Furnish materials that will facilitate the re-creation of memories or experiences that a child can share (for example, materials and medium to re-create a memory of a field trip apple picking).
13. Display children's artwork on their eye level on a rotating basis, along with other items of beauty (e.g., wall hangings, tapestry, weavings, posters, stained glass, or arrangements of flowers and leaves).
14. Borrow library prints of great artwork representing a variety of countries and ethnic groups, hang them at the eye level of the children, and have conversations about them.

# Social Connections

## Goal CD-6: Children demonstrate knowledge of relationships and roles within their own families, homes, classrooms, and communities.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Intently observe actions of children, adults, pets, and objects nearby. <i>CD-6a</i></li> <li>Seek parents, siblings, caregivers, and teachers for play and for meeting needs. <i>CD-6b</i></li> </ul>	<ul style="list-style-type: none"> <li>Imitate routine actions of their caregivers (rock a baby doll, push a lawnmower, “read” a magazine). <i>CD-6c</i></li> <li>Know whom they can go to for help (regular caregiver vs. visitor, parent vs. neighbor). <i>CD-6d</i></li> </ul>	<ul style="list-style-type: none"> <li>Use play to show what they know about relationships and roles in families and other familiar contexts. <i>CD-6e</i></li> <li>Talk about what others do during the day (“Mommy at work. Mimi at home.”). <i>CD-6f</i></li> <li>Help with daily routines (put cups out for lunch, feed pets, wash tables). <i>CD-6g</i></li> </ul>	<ul style="list-style-type: none"> <li>Talk about close family members, name their relationships to each other, and describe family routines (“Marika is my sister.” “My grandma takes care of me at night.”). <i>CD-6h</i></li> <li>Adopt roles of family and community members during play, given support and realistic props. <i>CD-6i</i></li> <li>Recognize and identify the roles of some community helpers (police, fire fighters, garbage collectors). <i>CD-6j</i></li> </ul>	<ul style="list-style-type: none"> <li>Talk about a wide circle of family members and other people important to the family, their relationships to each other, and shared experiences. <i>CD-6k</i></li> <li>Adopt roles of a wide variety of family and community members during dramatic play, using props, language, and actions to add detail to their play. <i>CD-6l</i></li> <li>Recognize and identify the roles of a wide variety of community helpers (police, fire fighters, garbage collectors, doctors, dentists). <i>CD-6m</i></li> </ul>

Children’s families and communities differ from each other and from their teachers’ family and community. Teachers and caregivers can best support children’s understanding of their family, home, and community by being accepting and respecting each child’s unique experiences with relationships and roles.

**Goal CD-7: Children recognize that they are members of different groups  
(e.g., family, preschool class, cultural group).**

**Developmental Indicators**

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Show a clear preference for familiar people. <i>CD-7a</i></li> </ul>	<ul style="list-style-type: none"> <li>Recognize children and others they spend a lot of time with (make sounds, say name, move toward or away from child). <i>CD-7b</i></li> </ul>	<ul style="list-style-type: none"> <li>Put self into categories based on age, gender, and physical characteristics ("I'm a girl." "I have long hair."). <i>CD-7c</i></li> </ul>	<ul style="list-style-type: none"> <li>Identify self as a part of a specific family, preschool class, or other familiar group (e.g., point to picture and say, "That's my family," or "I'm in Ms. Emily's class."). <i>CD-7d</i></li> </ul>	<ul style="list-style-type: none"> <li>Identify and express self as a part of several groups (e.g., family, preschool class, faith community). <i>CD-7e</i></li> </ul>

## Goal CD-8: Children identify and demonstrate acceptance of similarities and differences between themselves and others.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<ul style="list-style-type: none"> <li>Compare their own physical features with those of others by looking and touching. <i>CD-8a</i></li> </ul>	<ul style="list-style-type: none"> <li>Describe people who are similar and different based on characteristics such as age, gender, and other physical characteristics. <i>CD-8b</i></li> <li>Show awareness of similarities and differences among people and families during play. <i>CD-8c</i></li> </ul>	<ul style="list-style-type: none"> <li>Show acceptance of people who are different from themselves as well as people who are similar. <i>CD-8d</i></li> <li>Given support and guidance, explore different cultural practices during play and planned activities. <i>CD-8e</i></li> </ul>	<ul style="list-style-type: none"> <li>Show acceptance of people who are different from themselves as well as people who are similar. <i>CD-8f</i></li> <li>Talk about how other children have different family members and family structures than their own ("I live with my Grandma and Shanika lives with her Mom and Dad." "David's dad works but my Daddy stays home and takes care of me."). <i>CD-8g</i></li> <li>Show acceptance of different cultures through exploration of varying customs and traditions, past and present (how people dress, how people speak, food, music, art, etc.). <i>CD-8h</i></li> </ul>

Children's ability to identify and demonstrate acceptance of similarities and differences with other people is based on opportunities they have to see teachers and caregivers modeling acceptance and respect, and opportunities to talk about the importance of accepting people who are similar to and different from themselves.

## Goal CD-9: Children explore concepts connected with their daily experiences in their community.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<i>Emerging</i>	<ul style="list-style-type: none"> <li>Use play to communicate what they know about their community (pretend to go to the store, pretend to be a police person). <i>CD-9a</i></li> </ul>	<ul style="list-style-type: none"> <li>Describe characteristics of the places where they live and play (say, “My house is big and there are trees in my yard.” “The playground has swings and a sandbox.”). <i>CD-9b</i></li> <li>Notice changes that happen over time (seasons, self or others growing bigger). <i>CD-9c</i></li> <li>Notice and talk about weather conditions. <i>CD-9d</i></li> <li>With prompting and support, participate as a member of a democratic classroom community (vote for name of class pet, wait turn to paint when easels are full). <i>CD-9e</i></li> </ul>	<ul style="list-style-type: none"> <li>Describe characteristics of the places where they live and play (say, “My house is big and there are trees in my yard.” “The playground has swings and a sandbox.”). <i>CD-9f</i></li> <li>Observe and talk about changes in themselves and their families over time. <i>CD-9g</i></li> <li>Observe and talk about how people adapt to seasons and weather conditions (put out salt in icy weather, wear rain gear). <i>CD-9h</i></li> <li>Show awareness of the basic needs all families have (food, shelter, clothing) and how needs are met (work, help each other). <i>CD-9i</i></li> <li>Demonstrate positive social behaviors and take personal responsibility as a member of a group (share, take turns, follow rules, take responsibility for classroom jobs). <i>CD-9j</i></li> </ul>

## Strategies for Infants and Toddlers

### Social Connections

1. Hold and hug infants and toddlers throughout the day. Learn from families how they hold, calm, and soothe their infant so you can do the same. This helps each child feel safe and secure.
2. Tell infants and toddlers what you are going to do before you perform caregiving tasks. ("I'm going to wash your face and then we can play.")
3. Learn as much as you can about the cultures of the families in your program. Provide books, pictures, toys, music, and other materials that are familiar to children. This brings their cultures into the play area in positive ways.
4. Provide materials and activities that show other cultures and people from many different backgrounds in positive ways so children can see and experience how diverse humans are (diversity of all types including gender, race, ethnicity, sexual orientation).
5. Learn to say a few important words in the home language of infants and toddlers whose families speak a different language. (Consult with parents about which phrases are most important.)
6. Model pleasant, polite interactions with family members and other adults. Infants and toddlers will imitate you.
7. Help toddlers begin to recognize and explore differences among people. Talk about these differences in a positive way.
8. Allow and support children's choice of playmates. Help children play together, including children who are different from each other. Model and encourage gentle touch while playing. Make a special effort to help children who speak different languages play together by helping them communicate with each other.
9. Allow toddlers to help with daily routines such as putting out napkins, folding laundry, feeding pets, and watering plants. Adapt tasks so children with disabilities can participate.
10. Share children's pleasure in learning and discovering new things through daily routines and their play, both indoors and outdoors. Take children to community events and places such as parks, playgrounds, and the petting zoo, farmer's market, and library to learn about the world.
11. Make scrapbooks or memory books and revisit them with the children.

# Social Connections

1. Equip a dramatic play area with a variety of props reflecting different aspects of families, communities, and cultures. This will encourage a true understanding of others. Change props according to the interests of the children.
2. Provide literature and music that reflect a variety of cultures and traditions.
3. Use literature, puppets, and role playing to help children relate to the feelings of others.
4. Give children access to a wide selection of quality multicultural books.
5. Implement activities that reflect the similarities and differences among the children and families within the classroom (e.g., do body tracing and provide children with multicultural crayons to represent the variety of skin tones).
6. Invite community helpers into the classroom.
7. Welcome families into the classroom to share their cultures, traditions, and talents.
8. Explore the physical, biological, and social world beginning with your school (e.g., a visit to another classroom) and then into the community through field trips.
9. Involve children in school and community service projects.
10. Model cooperation and negotiation. Involve children in making rules for the classroom.
11. Hold class meetings to discuss concerns and issues that occur in the classroom. Encourage children to use a variety of problem-solving strategies to work through any concerns (e.g., use role-playing and puppets to help children empathize with their peers).
12. Learn to say a few important words in the home language of children whose families speak a different language. (Consult with parents about which phrases are most important.)
13. Talk with children about relevant past and future events.

# Mathematical Thinking and Expression

## Goal CD-10: Children show understanding of numbers and quantities during play and other activities.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Indicate they want “more” with signs, sounds, or looks. <i>CD-10a</i></li> <li>Show interest (look at or reach for) in obvious differences in quantity (look at a tower with 3 blocks longer than a tower with 7 blocks, reach for a basket with three balls rather than a basket with one ball). <i>CD-10b</i></li> </ul>	<ul style="list-style-type: none"> <li>Explore quantity (for example, filling and dumping containers). <i>CD-10c</i></li> <li>Use words or actions that show understanding of the concepts of “more” and “all” (ask for more food, stop asking for more blocks when told they have “all” of the blocks). <i>CD-10d</i></li> <li>Recognize the difference between two small sets of objects (6 or under) that include a different number of objects (point to which set of crayons has more). <i>CD-10e</i></li> </ul>	<ul style="list-style-type: none"> <li>Use words or actions that show understanding of the concepts of “more,” “all,” and/or “none” (ask for more food, stop asking for more blocks when told they have “all” of the blocks, become upset when told there is no more Play-Doh®). <i>CD-10f</i></li> <li>Attempt to chant or recite numbers, but not necessarily in the correct order. <i>CD-10g</i></li> <li>Place items in one-to-one correspondence during play and daily routines (one spoon at each plate; one doll in each toy car). <i>CD-10h</i></li> </ul>	<ul style="list-style-type: none"> <li>Rote count in order to 10 with increasing accuracy. <i>CD-10j</i></li> <li>Count up to 5 objects arranged in a line using one-to-one correspondence with increasing accuracy, and answer the question “How many?” <i>CD-10k</i></li> <li>Compare visually two groups of objects that are obviously equal or unequal in quantity and communicate that they are the same or different, and which one has more (choose a plate with four cookies rather than a plate with one cookie). <i>CD-10l</i></li> </ul>	<ul style="list-style-type: none"> <li>Rote count in order to 20 with increasing accuracy. <i>CD-10n</i></li> <li>Without counting, state the number of objects in a small collection (1-3) (when a friend holds up two fingers, look at her hand and say, “Two fingers” without counting). <i>CD-10o</i></li> <li>Count up to 10 objects arranged in a line using one-to-one correspondence with increasing accuracy, and answer the question “How many?” <i>CD-10p</i></li> <li>Given a number 0-5, count out that many objects. <i>CD-10q</i></li> <li>Compare the amount of items in small sets of objects (up to 5 objects) by matching or counting and use language such as “more than” and “less than” to describe the sets of objects. <i>CD-10r</i></li> </ul>

## Goal CD-10: Children show understanding of numbers and quantities during play and other activities.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers (continued)	Younger Preschoolers (continued)	Older Preschoolers (continued)
		<ul style="list-style-type: none"> <li>Make a small group (1-3) with the same number of items as another group of items (take 3 balls from a basket after the teacher shows the group that she has 3 balls and asks each person to take the same number of balls). <i>CD-10i</i></li> </ul>	<ul style="list-style-type: none"> <li>Show they understand that adding objects to a group will make a bigger group, and taking away objects will make a smaller group. <i>CD-10m</i></li> </ul>	<ul style="list-style-type: none"> <li>Show they understand that putting two groups of objects together will make a bigger group and that a group of objects can be taken apart into smaller groups. <i>C-10s</i></li> <li>Write numerals or number-like forms during play and daily activities. <i>CD-10t</i></li> <li>Match numerals 1-5 to sets of objects, with guidance and support. <i>CD-10u</i></li> <li>Recognize some numerals and attempt to write them during play and daily activities. <i>CD-10v</i></li> <li>Show understanding of first, next, and last during play and daily activities (answer questions about who is first and last to slide down the slide; say, "The engine is first, and the caboose is last" when making a train). <i>CD-10w</i></li> </ul>

Children gain an understanding of numbers and mathematical concepts through hands-on activities that are related to real life better than activities that focus on the names of numbers and on counting objects just for the sake of learning to count.

## Goal CD-11: Children compare, sort, group, organize and measure objects and create patterns in their everyday environment.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Discover objects of different sizes by exploring (put toys in mouth, pick up large objects). <i>CD-11a</i></li> </ul>	<ul style="list-style-type: none"> <li>Participate in activities that compare the size and weight of objects. <i>CD-11b</i></li> <li>Show awareness of different categories during play (put balls in a box and dolls in a bed; give one friend all the cars and another friend all of the trucks when playing in the block area). <i>CD-11c</i></li> </ul>	<ul style="list-style-type: none"> <li>Group objects into categories (cars with cars, plates separated from cups). <i>CD-11d</i></li> <li>Use size and amount words to label objects, people, and collections (big truck, a lot of cookies, little baby). <i>CD-11e</i></li> </ul>	<ul style="list-style-type: none"> <li>Use descriptive language for size, length, or weight (short, tall, long, heavy, big). <i>CD-11f</i></li> <li>Use simple measurement tools with guidance and support to measure objects (a ruler, measuring cup, scale). <i>CD-11g</i></li> <li>Compare the size or weight of two objects and identify which one is longer/taller/heavier than the other ("That rock is heavier than this one; I can't lift it." "A snake is longer than a worm."). <i>CD-11h</i></li> <li>Identify familiar objects as the same or different. <i>CD-11i</i></li> <li>Sort familiar objects into categories with increasing accuracy (tools for woodworking and utensils for cooking; rectangle blocks on one shelf and square blocks on another shelf). <i>CD-11j</i></li> <li>Recognize simple repeating patterns and attempt to create them during play (repeat a movement pattern during a song, make a line of blocks in alternating colors). <i>CD-11k</i></li> </ul>	<ul style="list-style-type: none"> <li>Use descriptive language for size, length, or weight (short, tall, long, heavy, big). <i>CD-11l</i></li> <li>Use simple measurement tools with guidance and support to measure objects (a ruler, measuring cup, scale). <i>CD-11m</i></li> <li>Directly compare more than two objects by size, length, or weight ("That rock is heavier than these others; I can't lift it." Look at three strings that are different lengths and select the longest string). <i>CD-11n</i></li> <li>Put a few objects in order by length (arrange a group of 3 blocks in order from the shortest to the longest). <i>CD-11o</i></li> <li>Sort a group of objects (0-10) using one attribute (color, size, shape, quantity) with increasing accuracy (sort blocks by shape and place like-shaped blocks on the shelf; sort beads by color). <i>CD-11p</i></li> <li>Duplicate and extend simple patterns using concrete objects (look at a pattern of beads and tell what bead comes next in the pattern). <i>CD-11q</i></li> </ul>

## Goal CD-12: Children identify and use common shapes and concepts about position during play and other activities.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<ul style="list-style-type: none"> <li>Discover different shapes by exploring (put blocks in mouth, roll balls). <i>CD-12a</i></li> <li>Attempt to put objects into other objects (such as putting pieces into holes or other spaces). <i>CD-12b</i></li> </ul>	<ul style="list-style-type: none"> <li>Explore space with their bodies (fit self into large box, crawl under table, climb over low walls). <i>CD-12c</i></li> <li>Put basic shapes into a shape sorter using trial and error. <i>CD-12d</i></li> </ul>	<ul style="list-style-type: none"> <li>Respond to and begin to use words describing positions (in, on, over, under, etc.). <i>CD-12e</i></li> <li>Name or match a few shapes. <i>CD-12f</i></li> <li>Stack or line up blocks that are the same shape. <i>CD-12g</i></li> </ul>	<ul style="list-style-type: none"> <li>Show they understand positions in space by using position words during play and by following directions from an adult (say, "Stand behind the chair." "Put the ball in the box."). <i>CD-12h</i></li> <li>Use 2- and 3-dimensional shapes to create pictures, designs, or structures. <i>CD-12i</i></li> <li>Find shapes in the environment and describe them in their own words. <i>CD-12j</i></li> </ul>	<ul style="list-style-type: none"> <li>Consistently use a variety of words for positions in space, and follow directions using these words. <i>CD-12k</i></li> <li>Use 2- and 3-dimensional shapes to represent real-world objects (say, "We are building a castle and we need a round block for the tunnel." "I glued a circle and a square on my picture to make a house."). <i>CD-12l</i></li> <li>Name basic shapes and describe their characteristics using descriptive and geometric attributes ("That's a triangle; it's pointy." "It's a circle because it's round."). <i>CD-12m</i></li> </ul>

## Goal CD-13: Children use mathematical thinking to solve problems in their everyday environment.

### Developmental Indicators

Infants	Younger Toddlers	Older Toddlers	Younger Preschoolers	Older Preschoolers
<i>Emerging</i>	<i>Emerging</i>	<ul style="list-style-type: none"> <li>Use observation and emerging counting skills (1, 2, 3) during play and other daily activities. <i>CD-13a</i></li> </ul>	<ul style="list-style-type: none"> <li>Seek answers to questions by using mathematical thinking during play and daily activities (determine who is taller by standing next to classmate; find two smaller blocks to replace larger block). <i>CD-13b</i></li> <li>Use observation and counting (not always correctly) to find out how many things are needed during play and other daily activities (figure out how many spoons are needed for snack, find enough dolls so each person has one when playing in the dramatic play area). <i>CD-13c</i></li> <li>Use drawing and concrete materials to represent mathematical ideas (draw many circles to show “lots of people,” put Popsicle® sticks in a pile to show the number of children who want crackers for snack). <i>CD-13d</i></li> </ul>	<ul style="list-style-type: none"> <li>Seek answers to questions during play and daily activities using an increasing variety of mathematical strategies. <i>CD-13e</i></li> <li>Use observation and counting with increasing accuracy to answer questions such as “How many do we need?” and “How many more do we need?” during play and other daily activities (count new children to see how many more plates are needed for snack; return extra drinks to cooler at picnic to arrive at the correct number). <i>CD-13f</i></li> <li>Use drawing and concrete materials to represent an increasing variety of mathematical ideas (draw shapes to represent pattern; stack different-colored blocks to represent classmates’ answers to a survey question). <i>CD-13g</i></li> <li>Begin to explain how a mathematical problem was solved (“I saw that there was always a blue flower after a red flower so I knew to put a blue one next.” “I counted four friends who didn’t have cookies so I got four more.”). <i>CD-13h</i></li> </ul>
